Report United States. Climatological Service.
District no. 9 Colorado Valley 1912

Blount County, Alabama Confederate

Soldiers, Volume 3: Miscellaneous Robin

Sterling 2013-08-15 Mary Gordon Duffee wrote:

"When the drums beat, and the bugles called for men to march to the front, I tell you old Blount responded nobly, and sent hundreds of her gallant sons to march, fight, suffer and die for the flag that now lies furled forever." This series of books attempts to identify all the Confederate soldiers who enlisted in organizations from the Blount County area, along with those who moved to Blount County after the Civil War. Whole company rosters are captured and entire service records, pension applications, birth dates, spouses and marriage dates, newspaper

clippings and obituaries, and dozens of pictures are contained in these volumes. This is the first time ever all this information has been available in a single reference book. Volume 3 contains information on soldiers who enlisted in other Alabama organizations and those who moved to Blount County after the Civil War. These books are vital to any serious student of Blount County, Alabama genealogy and history.

Wildland Fire in Ecosystems 2008 This state-of-
knowledge review of information on
relationships between wildland fire and
nonnative invasive plants can assist fire
managers and other land managers concerned
with prevention, detection, and eradication or
control of nonnative invasive plants. The 16
chapters in this volume synthesize ecological
and botanical principles regarding relationships
between wildland fire and nonnative invasive
plants, identify the nonnative invasive species
currently of greatest concern in major
bioregions of the United States, and describe
emerging fire-invasive issues in each bioregion
and throughout the nation. This volume can help

increase understanding of plant invasions and
fire and can be used in fire management and
ecosystem-based management planning. The
volume's first part summarizes fundamental
concepts regarding fire effects on invasions by
nonnative plants, effects of plant invasions on
fuels and fire regimes, and use of fire to control
plant invasions. The second part identifies the
nonnative invasive species of greatest concern
and synthesizes information on the three topics
covered in part one for nonnative invasives in
seven major bioregions of the United States:
Northeast, Southeast, Central, Interior West,
Southwest Coastal, Northwest Coastal (including
Alaska), and Hawaiian Islands. The third part
analyzes knowledge gaps regarding fire and
nonnative invasive plants, synthesizes
information on management questions (nonfire
fuel treatments, postfire rehabilitation, and
postfire monitoring), summarizes key concepts
described throughout the volume, and discusses
urgent management issues and research
