Best STEM Resources for NextGen Scientists Jennifer L. Hopwood 2015-06-30 Intended to support the national initiative to strengthen learning in areas of science, technology, engineering, and mathematics, this book helps librarians who work with youth in school and public libraries to build better collections and more effectively use these collections through readers' advisory and programming. A versatile and multi-faceted guide, *Best STEM Resources for NextGen Scientists: The Essential Selection and User's Guide* serves as a readers' advisory and collection development resource for youth services and school librarians seeking to bring STEM-related titles into their collections and introduce teachers and young readers to them. This book not only guides readers to hundreds of the best STEM-related titles—fiction and non-fiction printed materials as well as apps, DVDs, websites, and games—it also includes related activities or programming ideas to help promote the use of the collection to patrons or students in storytime, afterschool programs, or passive library programs. After a detailed discussion of the importance of STEM and the opportunities librarians have for involvement, the book lists and describes best STEM resources for young learners. Resources are organized according to the reading audiences for which they are intended, from toddlers through teens, and the book includes annotated lists of both fiction and nonfiction STEM titles as well as graphic novels, digital products, and online resources. In addition, the author offers a selection of professional readings for librarians and media specialists who wish to further expand their knowledge.

100 Fun & Easy Learning Games for Kids Amanda Boyarshinov 2016-05-24 Learn While You Play With These Fun, Creative Activities & Games From two experienced educators and moms, *100 Fun & Easy Learning Games for Kids* prepares your children to thrive in school and life the fun way by using guided play at home to teach important learning topics—reading, writing, math, science, art, music and global studies. Turn off the TV and beat boredom blues with these clever activities that are quick and easy to set up with common household materials. The huge variety of activities means you can choose from high-energy group games full of laughter and delight, or quiet activities that kids can complete on their own. All activities highlight the skill they teach, and some are marked with a symbol whether they are good for on-the-go learning or if they incorporate movement for kids to get their wiggles out. In *Zip-Line Letters*, children learn letter sounds as the letters zoom across the room. In *Parachute Subtraction*, place foam balls in a parachute, then kids shake the parachute and practice subtraction as they count how many balls fall off. Kids will have so much fun, they won't even realize they're gaining important skills! The activities are easy to adapt for all ages and skill levels. *100 Fun & Easy Learning Games for Kids* is the solution for parents—as well as teachers, caregivers or relatives—to help kids realize how fun learning can be and develop what they'll need to do well wherever life takes them.

The United States Government Internet Directory, 2010 Peggy Garvin 2010-12-21 The Directory:

contains more than 2,000 Web site records, organized into 20 subject-themed chapters. It provides descriptions and URLs for each site and describes sites to help in choosing the proper resource. It also provides Web site descriptions that includes information about the sponsoring agency and notes the useful or unique aspects of the site as well as listing some of the major government publications hosted on the site. It evaluates the most important and frequently sought sites providing a roster of congressional members with members' Web sites and includes a one-page "Quick Guide" to the major federal agencies and the leading online library, data source, and finding aid sites. There are multiple indexes in the back of the book to help locate Web sites by agency, site name, subject, and government publication title. The Master Index combines the agency, site name, and subject indexes. A separate index lists Web sites with full or substantial Spanish-language versions.

Handbook of Research on the Global Empowerment of Educators and Student Learning Through Action Research Slapac, Alina 2021-05-07 The year 2020 brought an unprecedented worldwide health crisis through the COVID-19 pandemic that has been affecting all sectors, including education. There were questions surrounding the effectiveness of online trainings for teachers, online teaching practices, the motivation and engagement of students, and the quality of learning and education in these times. Action research emerged to address these concerns, being a systematic process of inquiry using reflection within a cyclical model of planning, acting, implementing, evaluating, and continuous reflection. This method of research is employed with the expertise and passion from educators to better enhance online practices and education while using authentic learning and experiences. Using collaboration, social advocacy, and action research, there is the opportunity to advance teaching for students, families, and communities without a physical context involved. The *Handbook of Research on the Global Empowerment of Educators and Student Learning Through Action Research* explores successful teaching and learning skills through the method of action research and intersects it with online learning in order to uncover best teaching practices in online platforms. This book showcases educational professionals' action research for solutions in advancing teaching and learning, the practical benefits of action research, recommendations for improving online teaching and learning, and a focus on professional growth as well as social justice advocacy. It highlights important topics including student learning, teacher collaboration, authentic learning, advocacy, and action research in both K-12 and higher education settings. This book is ideal for inservice and preservice teachers, administrators, teacher educators, practitioners, researchers, academicians, and students interested in how action research is improving and advancing knowledge on the best teaching practices for online education.
