Douglas Carnine 2010 For

Instruction, Remedial Reading,

Education Students.

Thoroughly integrating the  
latest guidelines from the  
National Reading Panel, this is  
a practical guide to teaching  
reading via the direct  
instruction reading approach, a  
proven program that's  
especially powerful with the

most vulnerable learners - those at-risk because of poverty, disability/limited English. Rather than simply list method after method, these nationally known and respected authors provide a specific repertoire of carefully sequenced, highly prescriptive procedures for teaching decoding, comprehension, content reading, and study skills. For each skill to be taught, they recommend strategies, discuss optimal timing, offer examples, and explain how to correct errors. In addition, they thoughtfully examine the relationships among different reading skills.

Introduces pre-service and in-service teachers to the most current theories and methods for teaching literacy to children in elementary schools. The methods presented are based on scientific findings that have been tested in many classrooms. A wealth of examples, hands-on activities, and classroom vignettes-- including lesson plans, assessments, lists of children's literature books to fiction and nonfiction texts, and more-- illustrate the methods and bring them to life. The text highlights the importance of teaching every child to become competent in.
