Policing and Boundaries in a Violent Society Guy Lamb 2022-01-31 This book explores how social and territorial boundaries have influenced the approaches and practices of the South Africa Police Service (SAPS). By means of a historical analysis of South Africa, this book introduces a new concept, 'police frontierism', which illuminates the nature of the relationships between the police, policing and boundaries, and can potentially be used for future case study research. Drawing on a wealth of research, this book examines how social and territorial boundaries strongly influenced police practices and behaviour in South Africa, and how social delineations amplify and distort existing police prejudices against those communities on the other side of the boundary. Focusing on cases of high-density police operations, public-order policing and the recent policing of the COVID-19 lockdown, this book argues that poor economic conditions combined with an increased militarisation of the SAPS and a decline in public trust in the police will result in boundaries continuing to fundamentally inform police work in South Africa. This book will be of interest to scholars and students interested in policing in post-colonial societies characterised by high levels of violence, as well as police work and police militarization.

**Urbanization and Development** 2016 The analysis of urban development of the past twenty years presented in this maiden edition of the World Cities Report shows, with compelling evidence, that there are new forms of collaboration and cooperation, planning, governance, finance and learning that can sustain positive change. The Report unequivocally demonstrates that the current urbanization model is unsustainable in many respects. It conveys a clear message that the pattern of urbanization needs to change in order to better respond to the challenges of our time, to address issues such as inequality, climate change, informality, insecurity, and the unsustainable forms of urban

expansion.

**Africa's Lions** Haroon Borat 2016-11-08 Examining the economic forces that will shape Africa's future. Africa's Lions examines the economic growth experiences of six fast growing and/or economically dominant African countries. Expert African researchers offer unique perspectives into the challenges and issues in Ethiopia, Ghana, Kenya, Mozambique, Nigeria, and South Africa. Despite a growing body of research on African economies, very little has focused on the relationship between economic growth and employment outcomes at the detailed country level. A lack of empirical data has deprived policymakers of a robust evidence base on which to make informed decisions. By harnessing country-level household, firm, and national accounts data together with existing analytical country research—the authors have attempted to bridge this gap. The growth of the global working-age population to 2030 will be driven primarily by Africa, which means that the relationship between growth and employment should be understood within the context of each country's projected demographic challenge and the associated implications for employment growth. A better understanding of the structure of each country's workforce and the resulting implications for human capital development, the vulnerably employed, and the working poor, will be critical to informing the development policy agenda. As a group, the six countries profiled in Africa's Lions will largely shape the continent's future. Each country chapter focuses on the complex interactions between economic growth and employment outcomes, within the individual Africa's Lions context.

**National Human Development Report 2014** United Nations Publications 2015 Over the 15 years since the country's last National Human Development Report (NHDR) was published Ethiopia has undergone significant economic and social changes and has recorded some of the highest growth rates in the world-over 10 per cent in some years. However, Ethiopia's Human Development Index (HDI) and its relative ranking have not moved appreciably during the past decade. Even though Ethiopia is one of the 10 countries globally that has attained the largest absolute gains in its HDI over the last several years, it still ranks 173rd out of 186 countries in the latest UNDP Human Development Report. It is this development challenge that underlines the fact that the preparation of the NHDR is so opportune now and why the focus of the report on inclusive growth for sustainable human development is so apposite. In 1998, when the last NHDR was written, the development challenges facing the country were considerably different.

**World Survey on the Role of Women in Development** United Nations Publications 2015-06-30 Ensuring women's economic empowerment and access to and control over resources requires an integrated approach to growth and development, focused on gender-responsive employment promotion and informed by the interdependency between economic and social development. Social objectives need to be incorporated into economic policies. Economic growth strategies should give attention to the real economy and focus on creating a gender-sensitive macroeconomic environment, full employment and decent work, access to land, property and other productive resources as well as financial services, and full coverage of social protection measures. The Survey outlines a number of concrete recommendations in these critical areas, which if adopted, will facilitate women's equitable access to and control over economic and financial resources.

**Global Land Grabs** Marc Edelman 2016-03-22 Since the 2008 world food crisis a surge of land grabbing swept Africa, Asia and Latin America and even some regions of Europe and North America. Investors have uprooted rural communities for massive agricultural, biofuels, mining, industrial and urbanisation projects. 'Water grabbing' and 'green grabbing' have further exacerbated social tensions. Early analyses of land grabbing focused on foreign actors, the biofuels boom and Africa, and pointed to catastrophic consequences for the rural poor. Subsequently scholars carried out local case studies in diverse world regions. The contributors to this volume advance the discussion to a new stage, critically scrutinizing alarmist claims of the first wave of research, probing the historical antecedents of today's land grabbing, examining large-scale land acquisitions in light of international human rights and investment law, and considering anew longstanding questions in

agrarian political economy about forms of dispossession and accumulation and grassroots resistance. Readers of this collection will learn about the impacts of land and water grabbing; the relevance of key theorists, including Marx, Polanyi and Harvey; the realities of China's involvement in Africa; how contemporary land grabbing differs from earlier plantation agriculture; and how social movements—and rural people in general—are responding to this new threat. This book was published as a special issue of Third World Quarterly.

Psychosocial Perspectives on Peacebuilding Brandon Hamber 2014-11-04

The book Psychosocial Perspectives on Peacebuilding offers a template for those dealing with the aftermath of armed conflict to look at peacebuilding through a psychosocial lens. This Volume, and the case studies that are in it, starts from the premise that armed conflict and the political violence that flows from it, are deeply contextual and that in dealing with the impact of armed conflict, context matters. The book argues for a conceptual shift, in which psychosocial practices are not merely about treating individuals and groups with context and culturally sensitive methods and approaches: the contributors argue that such interventions and practices should in themselves shape social change. This is of critical importance because the psychosocial method continually highlights how the social context is one of the primary causes of individual psychological distress. The chapters in this book describe experiences within very different contexts, including Guatemala, Jerusalem, Indian Kashmir, Mozambique, Northern Ireland, South Africa and Sri Lanka. The common thread between the case studies is that they each show how psychosocial interventions and practices can influence the peacebuilding environment and foster wider social change.

Psychosocial Perspectives on Peacebuilding is essential reading for social and peace psychologists, as well as for students and researchers in the field of conflict and peace studies, and for psychosocial practitioners and those working in post-conflict areas for NGO's.
