Fundamentals of Ecological  
Modelling Sven Erik Jørgensen  
1986 Very few books have been  
published to-date which  
provide an introduction to the  
topic of ecological modelling.  
Although many have been  
published on ecological  
modelling itself, it was  
necessary for the reader to  
already have an understanding  
of the field, or at least some  
experience in the development  
of ecological models, in order  
for him/her to be able to make  
full use of them. This easy-to-  
understand book aims to  
bridge this gap. The reader  
needs only an understanding of  
the fundamentals of  
environmental problems and  
ecology, although it is assumed  
that he/she has a fundamental  
knowledge of differential  
equations and matrix  
calculations. This monograph

provides on the one hand an  
overview of the field and on the  
other an opportunity for the  
reader to develop his/her own  
models. The book discusses the  
modelling procedure in detail  
and gives a step-by-step  
presentation of the  
development of models.  
Advantages and shortcomings  
of each step are discussed and  
simple examples are used to  
illustrate all the steps. Most  
model types are presented by  
use of theory, overview tables  
on applications, complexity,  
examples and illustrations.  
Both simple and complex  
models are described.

The Semantic Web: Research  
and Applications Asuncion  
Gómez-Pérez 2005-05-18 This  
volume contains the papers  
presented at the 2nd European  
Semantic Web Conference  
(ESWC 2005) held in

Heraklion, Crete, Greece, from 29th May to 1st June, 2005. The vision of the Semantic Web is to enhance today's Web via the exploitation of machine-processable metadata. The explicit representation of the semantics of data, accompanied with domain theories (ontologies), will enable a web that provides a qualitatively new level of service. It will weave together an - credibly large network of human knowledge and will complement it with machine processability. Various automated services will help the user to achieve goals by accessing and providing information in a machine-understandable form. This process may ultimately create extremely knowledgeable systems with various specialized reasoning services systems. Many technologies and methodologies are being developed within artificial intelligence, human language technology, machine learning, databases, software engineering and information systems that can contribute to

the realization of this vision.

The 2nd Annual European Semantic Web Conference presented the latest results in research and applications of Semantic Web technologies. Following the success of the first edition, ESWC showed a significant increase in participation.

With 148 submissions, the number of papers doubled that of the previous edition. Each submission was evaluated by at least three reviewers. The selection process resulted in the acceptance of 48 papers for publication and presentation at the conference (an acceptance rate of 32%). Papers did not come only from Europe but also from other continents.

The book collects selected papers presented at the 8th International Conference on Aerospace System Science and Engineering (ICASSE 2024), organized by Shanghai Jiao Tong University and hosted by Zhengzhou University of Aeronautics, China. ICASSE, organized annually since 2017 by Shanghai Jiao Tong University, provides a forum that brings together experts in aeronautics and astronautics to share new ideas and findings. This book presents high-quality contributions in the subject area of Aerospace System Science and Engineering, including topics such as Trans-space vehicle systems design and integration, Air vehicle systems, Space vehicle systems, Near-space vehicle systems, Opto-electronic system, Aerospace robotics and unmanned system, Aerospace robotics and unmanned system,

Communication, navigation and surveillance, Dynamics and control, Intelligent sensing and Information fusion, Aerodynamics and aircraft design, Aerospace propulsion, Avionics system, Air traffic management, Earth observation, Deep space exploration, Bionic micro-aircraft/spacecraft, Flight test engineering, Aviation economic development and industrial policy.
