*U. S. News and World Report Ultimate College Guide* U.S. News & World Report (Firm) 2007-10 In the simplest of terms, leadership is about influencing people to achieve an objective that is important to the leader, the group, and the organization. It is the human element -- leading, motivating, and inspiring, particularly during times of crisis, chaos, and complexity when directives, policy statements, and communiques have little effect on cold, exhausted, and stressed followers. Strong leadership encourages subordinates to go beyond the obligation to obey and commit to the mission in a way that maximizes their potential. "The Military Leadership Handbook" is a concise and complete manual that identifies, describes, and explains all those concepts, components, and ideas that deal with, or directly relate to, military leadership. The book is a comprehensive compendium that focuses on, among other subjects, cohesion, command, cultural intelligence, discipline, fear, and trust. this applied manual provides invaluable assistance to anyone who wishes to acquire a better understanding of both the theory and application of military leadership

**Varieties of Liberalization and the New Politics of Social Solidarity** Kathleen Thelen 2014-03-31 This book examines contemporary changes in labor market institutions in the United States, Germany, Denmark, Sweden, and the Netherlands, focusing on developments in industrial relations, vocational education and training, and labor market policy. It finds that there are in fact distinct varieties of liberalization associated with very different distributive outcomes. Most scholarship equates liberal capitalism with inequality and coordinated capitalism with higher levels of social solidarity. However, this study explains why the institutions of coordinated capitalism and egalitarian capitalism coincided and complemented one another in the 'Golden Era' of postwar development in the 1950s and 1960s, and why they no longer do so. Contrary to the conventional wisdom, this study reveals that the successful defense of the institutions traditionally associated with coordinated capitalism has often been a recipe for increased inequality due to declining coverage and dualization. Conversely, it argues that some forms of labor market liberalization are perfectly compatible with continued high levels of social solidarity and indeed may be necessary to sustain it.
