Advanced EEG Analysis Techniques for Neurological Disorders Jisu Elsa Jacob

2025-08-26 Electroencephalography (EEG) is a versatile tool that has significantly impacted the understanding and treatment of various neurological disorders. Due to its non-invasive nature and high temporal resolution, it allows the monitoring of brain activity in both real-time and across extended periods. Recent advancements in EEG technology, coupled with sophisticated computational algorithms, have provided unprecedented insights into the brain's functioning. However, the full potential of EEG analysis in detecting, diagnosing, and treating neurological disorders remains underexplored. The primary goal of this Research Topic is to highlight and address recent developments in EEG analysis techniques for neurological disorders. While traditional methods have been pivotal in understanding neurological disorders, leading researchers are innovating advanced EEG analysis techniques leveraging artificial intelligence, machine learning, and deep learning. These technologies are revolutionizing our ability to understand and treat disorders including epilepsy, Alzheimer's disease, depression, encephalopathy, and others. This Research Topic aims to gather researchers working on advanced EEG analysis techniques to share their knowledge, methodologies, and applications in a comprehensive manner. The ultimate aim is to expedite the evolution of EEG-based diagnosis and treatment strategies augmenting the fight against neurological disorders effectively.

The SAGE Handbook of Research in International Education Mary Hayden

2015-10-13 The landscape of international education has changed significantly in the last ten years and our understanding of concepts such as 'international', 'global' and 'multicultural' are being re-evaluated. Fully updated and revised, and now including new contributions from research in South East Asia, the Middle East, China, Japan, Australasia, and North America, the new edition of this handbook analyses the origins, interpretations and contributions of international education and explores key contemporary developments, including: internationalism in the context of teaching and learning leadership, standards and quality in institutions and systems of education the promotion of internationalism in national systems This important collection of research is an essential resource for anyone involved in the practice and academic study of international education, including researchers and teachers in universities, governmental and private curriculum development agencies, examination authorities, administrators and teachers in schools.

Advanced Technologies, Systems, and Applications IX Naida Ademović 2024-09-30

This book is a comprehensive compilation of articles that delve into the forefront of

interdisciplinary applications of innovative technologies. It presents the scientific inquiries and outcomes showcased at the 15th Days of the Bosnian-Herzegovinian American Academy of Arts and Sciences conference, held in Sarajevo, Bosnia and Herzegovina, from June 20 to 23, 2024. The collection highlights the latest advancements and will draw the interest of researchers in diverse domains of engineering, including civil engineering, data science and geographic information systems, computer science and artificial intelligence, advanced environmental engineering and project management, information and communication technologies, and advanced electrical power systems. This book serves as a testament to the ongoing pursuit of knowledge and innovation in these fields, offering insights into the current research landscape and future directions. The contributions not only expand the theoretical foundations but also explore practical applications that address contemporary challenges in technology and engineering. The editors gratefully acknowledge the dedicated efforts of all the symposia chairs of the 15th Days of BHAAAS whose meticulous planning and scholarly oversight have enriched this book and contributed to its scholarly significance.
