Diagnosis and Correction of Reading

Problems, Second Edition Darrell Morris 2013-10-02 This widely adopted text and teacher resource provides a comprehensive approach to assessing and remediating reading difficulties in grades K-6. Darrell Morris presents rich case studies of beginning and older readers struggling with different types of reading problems. He shows how to administer a thorough diagnostic battery and provide instruction tailored to each student's needs. In addition to one-to-one tutoring strategies, small-group and whole-class applications are discussed. Reproducible tools, book lists, and other user-friendly materials can be photocopied from the book or downloaded and printed in a convenient 8 1/2" x 11" size. New to This Edition *Detailed explanations of how to adapt the techniques for classroom use. *The latest

research findings pertaining to reading diagnosis. *Updated and expanded book lists.*Chapter on historical and theoretical foundations. See also the Morris Informal Reading Inventory: Preprimer through Grade 8, a complementary assessment tool that yields systematic data on K-8 students' reading abilities.

Literacy in Science, Technology, and the Language Arts Mary Hamm 1998-10-30

Technology, a product of science, is pushing against the linear boundaries of traditional storytelling. Moving in the direction of multiform stories and digital formats takes literacy well beyond the 3Rs. Students increasingly need to be critical and creative users of the new media. As the Internet becomes faster, more visually powerful, and easier to manipulate there will be an explosion of virtual environments, with literacy taking on a whole new meaning. While the word literacy has become almost synonymous with the word competence, the

authors prefer the definitions found in the new language arts and science standards. For example, the National Science Education Standards suggests that scientific literacy implies that a person can identify scientific issues underlying national and local decisions and express positions that are scientifically and technologically informed. As this book explores important new dimensions of linguistic and scientific literacy it looks at developing literacies not covered well in schools today. It is the authors' belief that an understanding of science and the processes of science can make major contributions to the ability to learn, reason, make decisions, and solve problems. Thus learning about the natural world helps develop intellectual tools of inquiry that can be used with the language arts and other disciplines. Interdisciplinary activities can help develop the skills in both science and language that are becoming so essential for personal fulfillment, performing in the workplace, and being an
