Aircrew Training Manual, OH-58D Kiowa

Warrior March 2013 United States

Government Army 2013-04-14 This aircrew training manual (ATM) TC 3-04.44 standardizes aircrew training programs (ATPs) and flight evaluation procedures. This manual provides specific guidelines for executing OH-58D aircrew training. It is based on battle-focused training principles outlined at the Army Training Network. It establishes crewmember qualification, refresher, mission, and continuation training and evaluation requirements. This manual applies to all OH 58D crewmembers and their commanders in the Active Army, the United States Army National Guard(ARNG), the Army National Guard of the United States (ARNGUS), and the United States Army Reserve (USAR) unless otherwise stated. This manual is not a stand-alone document; all requirements of Army Regulation (AR) 600-105, National Guard Regulation (NGR) 95-210, and Training Circular (TC) 3-04.11 to the ATP must be met. If differences exist between the maneuver description in the operator's manuals, this manual is the governing authority for training and flight evaluation purposes only. The operator's manual is the governing authority for operations of the aircraft. Implementation of this manual conforms to AR 95-1 and TC 3-04.11. If a conflict exists between this manual and TC 3-04.11, then TC 3-04.11 will take precedence. This manual will help aviation commanders, at all levels; develop a comprehensive ATP. By using the ATM, commanders ensure that individual crewmember and aircrew proficiency is commensurate with their units' mission and that aircrews routinely employ standard

techniques and procedures. Standardization officers, evaluators, and unit trainers (UTs) will use this manual and TC 3-04.11 as primary tools to assist the commander in developing and implementing the ATP. Crewmembers will use this manual as a "how to" source for performing crewmember duties. It provides performance standards and evaluation guidelines so that crewmembers know the level of performance expected. Each task provides a description of how the task should be completed to meet the standard. ATP commanders of active Army, National Guard, and Army Reserve units operating the OH-58D will use this ATM and TC 3-04.11 to develop individual commander's task lists for assigned aviators. ATP commanders with assigned contract pilots will develop individual commander's task lists tailored to the current contract position using this ATM, TC 3-04.11, AR 95- 20, current flight training guides and/or local command directives. The proponent of this publication is United States Army Training and Doctrine Command.

Training Circular (TC) 3-04.52 consolidates Guardrail and Guardrail/common sensor (GRCS) aircraft into one aircrew training manual (ATM) and standardizes aircrew training programs (ATPs) and flight evaluation procedures. This manual provides specific guidelines for executing RC-12 series aircrew training. The RC-12 ATM establishes crewmember qualification training, refresher training, mission training, continuation training, and evaluation requirements. This manual applies to all Active Army, the United States (U.S.) Army National Guard (ARNG) and U.S. Army Reserve (USAR) RC-12 series crewmembers and their commanders. This manual is not a stand-alone document. All of the requirements contained in Army regulation (AR) 600-105, AR 600-106, National Guard regulation (NGR), NGR 95-210, and TC 3-04.11 must be met. If differences exist between the maneuver descriptions in the

operator manuals and this publication, this publication is the governing authority for training and flight evaluation purposes. Implementation of this publication conforms to AR 95-1 and TC 3-04.11. If a conflict exists between this publication and TC 3-04.11 the ATP commander determines the method of accomplishment based upon the requirement and the unit's mission as to which manual takes precedence. This manual in conjunction with the ARs and TC 3-04.11 will help aviation commanders at all levels develop a comprehensive ATP. Using this ATM, commanders ensure that individual crewmember and aircrew proficiency is commensurate with their units' mission and that aircrews routinely employ standard techniques and procedures. Standardization officers, evaluators and unit trainers (UTs) will use this manual and TC 3-04.11 as the primary tools to assist the commander in developing and implementing their ATP. Crewmembers will use this manual as a "how to" source for performing crewmember duties. It provides performance standards and evaluation guidelines so that crewmembers know the level of performance expected. Each task has a description of the proper procedures for completion to meet the standard.

It establishes crewmember qualification, refresher, mission, and continuation training and evaluation requirements. This manual applies to the MQ-1C Unmanned Aircraft System (Gray Eagle) crewmembers and their commanders. This manual, in conjunction with other Army publications, will help UAS commanders at all levels develop a comprehensive ATP. By using

this TC, commanders ensure that individual and crew proficiency matches their units' mission and that unmanned aircraft crewmembers (UACs) routinely employ standard techniques and procedures. UACs will use this manual as a "how to" source for performing crewmember duties. This manual provides performance standards and evaluation guidelines so that crewmembers know the level of performance expected. Each task has a description that details how it should be performed in order to meet the standard. Standardization personnel, evaluators, and unit trainers will use this manual and Army Regulation (AR) 95-23 as the primary tools to assist the commander in developing and implementing this ATP.

Aircrew Training Manual Department of the Army 2003-04-29 This training circular (TC) addresses training guidance for all C-12 aircraft. It establishes crewmember qualification and refresher, mission, and continuation training requirements. Used with TC 1-210 this manual will help aviation commanders at all levels develop a comprehensive aircrew training program. Two fatal training accidents occurred in Guardrail RC-12 aircraft. After these accidents, the commanding general of the U.S. Army Intelligence Center and Fort Huachuca, Fort Huachuca, Arizona, directed reexamination of Guardrail aircrew training. A yearlong study team reviewed aircraft certification and applicable Federal Aviation Regulations. The team conducted extensive discussions with the Federal Aviation Administration to gain an understanding of the context of pilot training versus the size of the airframe. Raytheon test pilots explained the operator's manual performance charts and their use. In addition, the team went outside the Army to examine how other Super King Air (C-12) schools conduct training. The team conducted interviews and

examined the training literature of the U.S. Navy, Flight Safety International, Simuflite, and the U.S. Air Force. The flight tasks and the base task list reflect the outcome of this study. The study team carefully evaluated training benefit versus risk during the task development phase. It made the following changes: integrated crewmembers into training; standardized crew callouts; added behavior outcomes to standards; and allowed flexibility in the description of flight tasks. These changes ensure pilots are not penalized for using their judgment. Takeoff and landing data cards, adopted from the civilian section, allow aircrews to develop a takeoff plan for an emergency should it occur after V1. Flight simulator training is now a mandatory element of aircrew training. High-risk training will be performed in the simulator instead of the airplane. In addition, a maintenance designated instructor pilot has replaced the maintenance test pilot evaluator.

"During routine night operations off Southern California, an F/A-18 from the U.S.S. Abraham Lincoln is inexplicably blown from the sky. The Pentagon wants to throw a blanket over the incident; but then another navy fighter jet is mysteriously destroyed in midair. The president orders an investigation to find out who is responsible for the attacks and why."--Jacket.
