## **Changing the Course of Failure** Sandra Stotsky

2018-05-18 The basic purpose of this book is to help policy makers at all levels of government understand that (1) widespread adolescent underachievement is not susceptible to solution by educational interventions no matter how much money is allocated to public education; and (2) there are unidentified educational and civic costs to focusing on low achievement and to expecting public institutions of education (for K-12 and college) to solve a growing social problem. Many policy makers seem to think that teachers/schools are the primary cause of low achievement. Educational institutions still cannot solve a non-education-caused problem and haven't done so for over fifty years despite all the public and private money that has been allocated. The book

concludes with suggested policies for addressing the damage to public education from "gap-closing" standards and with suggested areas for policy making in order to change the current course of failure for many low-achieving students.

## Explicating Maxine Greene's Notion of Naming and Becoming: "I Am ... Not Yet"

Christine Debelak Neider

2021-09-06 This volume offers a Naming praxis with which teachers might more closely align with their ethical ideals in the midst of their daily practice and relationships with students. Framed ontologically in Maxine Greene's existential-phenomenological notion of Becoming, the author explicates Greene's Naming as a praxis within her own early teaching experiences through the interpretive methods of currere and teacher lore. This study evolves in epistolary conversation with Maxine

Greene, teacher colleagues, and new teachers. It demonstrates the possibilities of applying critical reflective and discursive dialogue to the tensions of a teacher's life of practice in order to identify the obstacles to and the opportunities of the Becoming of the teacher and the student(s) in the educational encounter.

*Implementing Evidence-Based Practices in Gifted Education*

Susan Johnsen 2021-09-10

According to the Every Student Succeeds Act (ESSA),

evidence-based practices are supported by rigorous research designs and demonstrate that they improve student outcomes, but the actual implementation of these practices in schools is limited.

This essential guidebook assists coordinators of gifted education in implementing three evidence-based practices: universal screening, grouping, and acceleration. Each module includes an overview of research, administrative and assessment considerations,

forms for implementing the practice, scripted presentation slides for educators and parents, and resources.

Modules may be used by educators within a series of workshops for an entire school district, on an individual campus or for important stakeholders.
