Modelling Armoured Cars of World War II

Robin Buckland 2021-08-23 This book is designed to be a valuable reference for wargamers and modellers who build and paint models of the armoured cars used during World War II. It includes extensive information on the many different types, some well known and others less so, with photographs of vintage vehicles to help create realistic models. It is aimed at new entrants to this hobby, as well as those who wish to widen their field of interest. With over 220 colour photographs, this book includes hints and tips on modelling tools and accessories; British, Commonwealth, German, Italian, Hungarian, Japanese, American, Soviet

and French armoured cars, and more. There are guidelines for building plastic, resin and metal models in 1/76, 1/72, 1/48 and 1/35 scales. Real-life reference pictures and a 3D-printed model is featured.

Alamein Simon Ball 2016-08-17 El Alamein was one of the pivotal battles of the Second World War, fought by armies and air forces on the cutting edge of military technology. Yet Alamein has always had a patchy reputation - with many commentators willing to knock its importance. This book explains just why El Alamein is such a controversial battle. Based on an intensive reading of the contemporary sources, in particular the extensive and recently declassified British bugging of Axis prisoners of war, military

historian Simon Ball turns Alamein on its head, explaining it as a cultural defeat for Britain. Alamein is a military history of the battle - showing how different it looks stripped of later cultural excrescences. But it also shows how 'Alamein culture' saturated the post-war world, when archival sources mingled with film, novels, magazines, popular histories, and the rest of Alamein's footprint. Whether you are interested in the battle itself or its cultural afterlife, if you have an opinion about Alamein, you'll question it after reading this book.

Modelling British World War II Armoured Vehicles Tom Cole 2019-03-25 This new book will be an essential reference for modellers and wargamers who build and paint World War II British armoured fighting vehicles. It provides extensive information on different types of vehicles, describing when they were used, by whom and for what purpose. In addition, the many modifications made to vehicles during the war are included, with guidance on how to create these for models. The step-by-step building and painting guides illustrate vehicles in 1/35, 1/72 and 1/76 scale. This book features models, often with a comparison of models from
