2009-05-04 "Outstanding... should be on every home educator's reference bookshelf." -- Homeschooling Today This educational bestseller has dominated its field for the last decade, sparking a homeschooling movement that has only continued to grow. It will instruct you, step by step, on how to give your child an academically rigorous, comprehensive education from preschool through high school. Two veteran home educators outline the classical pattern of education -- the trivium -- which organizes learning around the maturing capacity

of the child's mind. With this model, you will be able to instruct your child in all levels of reading, writing, history, geography, mathematics, science, foreign languages, rhetoric, logic, art, and music, regardless of your own aptitude in those subjects. Newly revised and updated, *The Well-Trained Mind* includes detailed book lists with complete ordering information; up-to-date listings of resources, publications, and Internet links; and useful contact information.

Creativity as Progressive Pedagogy:

Examinations Into Culture, Performance, and Challenges Raj, Ambika Gopal 2021-11-12

In every era, global progressive thinkers have used creativity as a means for cultural reformation and social justice in response to oppressive regimes. For example, theater, cartoons, social art, film, and other forms of representative arts have always been used as critical instigation to create agency or critical commentary on current affairs. In the education sector, teachers in schools often say one of two

things: they are not creative or that they don't have the time to be creative given the curricular demands and administrative mandates that they are required to follow. Each day, educators are working to find exceptionally creative ways to engage their students with limited resources and supplies, and this becomes even more of a challenge during turbulent times. Creativity as Progressive Pedagogy: Examinations Into Culture, Performance, and Challenges primarily focuses on pedagogical creativity and culture as related to various aspects of social justice and identity. This book presents experience-based content and showcases the necessity for pedagogical creativity to give students agency and the connections between cultural sensitivity and creativity. Covering topics such as the social capital gap, digital spaces, and underprivileged students, this book is an indispensable resource for educators in both K-12 and higher education, administrators, researchers, faculty, policymakers, leaders in education, pre-service

teachers, and academicians.
