## **Infectious Disease**

### **Pharmacotherapy Self**

**Assessment** Lea S. Eiland  
2015-07-01 Infectious disease (ID) is a constant concern for pharmacy clinicians, with far too few specialists to meet the demand. That means that while more and more pharmacists are seeking the added qualification in infectious disease along with other Board Certifications, many clinical pharmacists have to meet a higher standard as de facto ID specialists. Further, treatment of infectious disease involves a good deal of grey area, which means that even the experts need a way to verify their mastery Now, *Infectious Disease Pharmacotherapy Self Assessment*, by Lea Eiland and Diane Ginsburg, bring you thorough and relevant cases where questions are delivered with varying degrees of difficulty, allowing you to truly gauge your level of

understanding of complex ID pharmacotherapy problems. Three levels of difficulty offers users a way to assess their mastery of ID topics.

professional with very minimal free time. I've always had a hard time staying focused while studying from large review article type study guides and have squandered hours reading while retaining very little. This book is intended to be a crash course/cheat sheet overview of the most highly testable material. I wanted to remember the really important stuff, because I know it is impossible to know every minute detail. BCPS Bullets, the Condensed BCPS Study Guide will help prepare you for the exam as well as help you maximize your study time. We covered over 100+ disease states straight from the BCPS content outline provided by BPS, and included important pearls for each condition including assessments, risk factors, most commonly used drugs of choice, must know adverse effects, miscellaneous clinical pearls, notorious drug interactions, warnings and precautions, and of course, relevant labs. I wanted to cover each disease state in 1-2 pages

to try to ensure you are reviewing the most relevant content. We did go over 2 pages on some disease states, but we did our best to keep the information concise and critical for you to know in your preparation to becoming a Board Certified Pharmacotherapy Specialist. The book is over 300+ pages, but it is in bullet point format and very easy to digest multiple disease states at a sitting. There is also some white around the margins to take additional notes or highlight essential information to remember. As many of you are aware from the content outline, the BCPS exam is not all clinical. In addition to the disease states on the BCPS content outline, we've also included sections on biostatistics as well as important regulatory issues. I can assure you that there is no doubt this book will help in your preparation to becoming a BCPS pharmacist! The Board Certified Pharmacotherapy Specialist (BCPS) is a designation from the Board of

Pharmacy Specialties. The contents within this study guide are not affiliated or endorsed by the Board of Pharmacy Specialties.
