

Cargo Resolution 600a

An Introduction to Air Law Isabella Henrietta Philepina Diederiks-Verschuur 2001-10-31 An Introduction to Air Law offers a comprehensive and up-to-date view of all the main components making up this interesting and topical branch of international law. The material, spread over ten chapters, includes items such as liability of the carrier, insurance, product liability, sovereignty in airspace, offenses such as hijacking, and assistance and salvage. The main themes of the book are the so-called Warsaw System and the Chicago Convention on Civil Aviation, being the two pillars of support of the present-day aviation legislation. The text of this edition has been adapted considerably in view of recent events and current developments. A number of relevant new cases has been added. An index by subject and an extensive bibliography complete the volume.

Civil Aviation Tim Unmack 1999 "Civil Aviation: Standards and Liabilities" examines operational standards and obligations and investigates the consequences and failure to comply with them, utilising source material from major treaties such as the Chicago Convention on Civil Aviation 1944 and its key ICAO Annexes. Key features of the ICAO Convention signed at Montreal in 1999, including carrier liability for passenger bodily injury or death, are also considered. The text also examines the changing nature of civil aviation in Europe and highlights the advent of the Joint Aviation Authority (JAA) and the increasing application of the Joint Aviation Requirements (JARs), paying particular attention to their effect upon flight crew training procedures. The book also investigates topics found in international aviation litigation as well as risk management, aviation insurance and product liability.
