The Brain and Spinal Cord in 3D Jack Becker 2015-07-15 Everyone knows that the brain is responsible for our smarts and the spinal cord holds us up, but students may be surprised to learn how much more these powerhouses are responsible for. Together they control the nervous system. Without them, we would not be able to think, remember, digest nutrients, breathe, blink, swallow, and so much more. Featuring clear and arresting 3D illustrations, this volume takes readers through the brain and spinal cord, covering their parts and functions, and serves as a comprehensive introduction to the human body.

Senses, Nervous & Respiratory Systems: The Nervous System - Brain Gr. 5-8 Susan Lang 2015-10-01 ****This is the chapter slice "The Nervous System - Brain" from the full lesson plan "Senses, Nervous & Respiratory Systems"**. How long is a nerve cell? How are our lungs like a train station? We answer these questions and much more in our second resource on the human body. Curriculum-based material written in an easy-to-understand way makes this a hit for teachers and students alike. Loaded with information on the brain, spinal cord and nerves, students will learn the main parts of the nervous system and how each works. Also investigate the organs of the five senses, and then take a trip around the respiratory system! Find out exactly where air goes when we breathe it in, and then out. Reading passages, comprehension questions, hands-on activities and color mini posters are provided. Also included: Crossword, Word Search, Test Prep and Final Quiz. All of our content is aligned to**

your State Standards and are written to Bloom's Taxonomy and STEM initiatives.

Nervous System Kristin Petrie 2006-08-15 Through engaging, easy-to-read text, young readers learn that the human body's nervous system is like a supercomputer that coordinates all of the body's actions and reactions. Both the central nervous system and the peripheral nervous system, as well as their parts are discussed. Readers discover that the brain and the spinal cord make up the central nervous system and that the spinal cord connects the brain to the peripheral nervous system, which contains all the nerves in the body. The book explains that the nervous system makes the heart beat, keeps us breathing, and allows us to see and read. The brain's various parts, the cerebrum, the cerebellum, the brain stem, the hippocampus, the pituitary gland, and the hypothalamus, are also discussed, as well as the functions of these various parts, including control of our voluntary and involuntary muscles, control of our memory, sending growth hormones throughout the body, and regulating the body's temperature. A detailed diagram of a labeled neuron is included. Kid-friendly text and a graphic explanation describe how pain messages throughout the body. Senses, reflexes, and diseases that cause the nervous system to function improperly, such as multiple sclerosis and epilepsy, are also discussed. Common brain and spinal cord injuries and the ways to avoid these injuries are also highlighted. Readers also learn about the nutrients necessary to keep the nervous system working properly. These include glucose, fat, protein, vitamins, and minerals. Full-color photos, detailed diagrams, medical models, phonetics, glossary, and index enhance the text.
