The Lea Guide To Composition James D. Williams 2005-04-11
The LEA Guide to Composition is firmly based on research into how people learn to write and draws on the most significant strategies and techniques in composition studies. But this text is not just about the act of writing. It is about using writing as a vehicle for learning--about the world, about the academy, about oneself. The focus is on writing as a means of interpretation. The emphasis throughout is on encouraging reflection and developing critical thinking skills. Although the text suggests ways of teaching that reflect knowledge about how people most easily learn to become competent writers, it is specifically designed to allow for numerous approaches to teaching composition. Instructors will value this flexibility. This text is finely tuned to the needs and interests of today's composition students and teachers. Classroom tested at various universities over a four-year period to refine and improve its effectiveness, the Guide is distinguished by a range of carefully crafted

instructional features: *Reading-Writing Connection. An extensive selection of fresh, thought-provoking, professional work allows students to internalize models and acquire appropriate genre familiarity. Student papers are included to illustrate how others have responded to real writing tasks similar to those the readers of this book will face. *Critical Reading and Thinking. Numerous reading selections are thoroughly analyzed to provide models of close, critical reading. Critical Reading Guides, provided for some selections, draw students in by asking rhetorical questions that develop critical thinking skills and better understanding of how the authors produced key effects. *Diverse Voices. Specially designed writing activities encourage students who are non-native speakers of English, or who come from non-mainstream cultural backgrounds, to share their perspectives with the entire class. *Writing Activities. More than 60 writing activities of various types are included, suitable for students with a range of writing experience. Many of these are short assignments that are linked to longer ones, which allows students to build their skills sequentially, adding new skills as old ones are practiced and mastered. *Writing Guides. Based on years of teaching experience, these guides provide detailed information and concrete, practical advice about how to succeed on selected assignments in each chapter. *Group Activities. Selected writing assignments include collaborative workshop activities that prompt students to engage in a variety of group efforts that enhance the writing process. As a result, group work progresses with a clear purpose and well-defined goals, leading to more student involvement and, ultimately, better writing. *Application of Key Ideas. Writing Assignments, Writing Guides, and Critical Reading Guides are complemented by activities that allow students to practice using important concepts discussed in the text that progress with a clear purpose and well-defined before they begin an actual assignment. *Journal Entries. Prompts throughout the text are included to increase the amount of writing students do, to enhance reflection and critical thinking, and to engage students in reflecting on and making connections between college and their lives outside of class. *Handbook. The handbook provides basic information about the form and function of language. It focuses on the usage conventions that are a crucial part of academic writing. In addition, it covers differences and similarities in the specific conventions that govern writing in the humanities, social sciences, and science. The documentation formats for these three major divisions of the undergraduate curriculum are described in detail, with full-length student papers to illustrate the formats in context. An Instructor's Manual is available with this text, upon adoption.

The Hermeneutics of Social Identity in Luke-Acts Nickolas A. Fox 2021-03-15
Luke-Acts presents a vision of the kingdom of God and the early church in a program of decentralization, that is, a movement away from the centralized power structures of Judaism. Decentralization of the temple, land, purity laws, and even the people that seem to possess the power early in Acts (i.e., Peter and the other apostles) makes room for a move of radical inclusion. Luke demonstrates the Holy Spirit as the prime initiator of outward expansion of the kingdom of God, radically including and welcoming God-fearers, gentiles, an Ethiopian eunuch, and more. Fox argues that Luke-Acts is purposed to create social identity in God-fearing readers using the rhetorical tools of the first century to communicate prescribed beliefs and norms, promise and fulfillment, and prototypes and exemplars. Each of these elements is examined and traced through Luke's two-volume work.

Critical Moments in Executive Coaching Erik de Haan 2019-05-14

Critical Moments in Executive Coaching examines the change process supported by workplace and executive coaching, making use of empirical evidence from the study of a range of real coaching conversations and coaching relationships. It is both a complete handbook that for the first time gives access to a global qualitative research base in the field of

executive coaching, and a look behind the scenes into the practice of both inexperienced and experienced coaches, their clients and their commissioners. Erik de Haan allows the reader access to the wealth of Ashridge empirical research in this field to date, alongside prominent research groups around the world. This book provides practitioners with a range of suggestions for their contracts, backed up by qualitative and narrative research. It looks at what research is already telling us about the value of coaching conversations and the impact of critical 'moments of change' in coaching, from the perspectives of coaches, clients, stakeholders and sponsors. The detailed research findings outlined in the book are supplemented throughout by case studies and snapshots of coaching moments as well as practical advice and insights for those working in the field. The book also brings forward innovative new models and concepts for coaches which have emerged from research. Critical Moments in Executive Coaching offers an evidence and research-based approach that will be of great interest to coaches in practice and in training, students of both undergraduate and graduate coaching programmes and those who supervise and commission coaching.

Deviance and Psychopathology Robert Endleman 1990 Reflecting on those people who are at odds with, or at war against society, their social situation, and their psychological situation, this book reviews the sociological and psychological studies of criminals, sexual deviants, drug abusers, the mentally ill, bohemians and political radicals.

Juvenile Justice and Delinquency Barry A. Krisberg 2017-02-14 Juvenile Justice and Delinquency brings into focus the causes of delinquency and provides students with a broad, up-to-date review of the latest research, statistical data, theories, and court decisions in the U.S. juvenile justice system. Author Barry Krisberg writes from a research-based approach which offers students pragmatic solutions to problems within the system—focusing on the reformative power of redemptive justice. Students will take away a foundational understanding of the current policies and issues shaping the juvenile justice system and practical strategies for helping juveniles improve and move their lives in a more positive direction.

Language Endangerment David Bradley 2019-11-21 Investigates the endangerment of languages and the loss of traditional cultural diversity, and how to respond.

An Evaluation of Very Sheltered Housing Anthea Tinker 1989 Very sheltered housing is the latest in a long line of special housing for elderly people. Like many new initiatives it evolved from experiments in different parts of the country, but up until now no evaluation of these innovative schemes had taken place. This research, a national survey followed by case studies of ten local authorities and ten housing associations, was intended to find out whether very sheltered housing was a cost effective option for frail elderly people, and one which they wanted. With the expected growth in the number of very elderly people it is important to consider all new forms of housing provision.
