Nonmammalian Animal Models for Biomedical Research Avril D. Woodhead 1989-11-30 This book provides essential knowledge and information required to adequately assess useful alternatives from among the lower vertebrates and the invertebrates. This volume highlights unfamiliar and underdeveloped organisms that have the potential to become very satisfactory surrogates for biomedical research. A practical guide aimed at disseminating information to researchers about new models, this work provides comparative biomedical studies at many levels of the phylogenetic ladder.

**How to Survive a Pandemic** Michael Greger MD 2020-05-26 A vital, timely text on the viruses that cause pandemics and how to face them, by the New York Times bestselling author of *How Not to Die*. As the world grapples with the devastating impact of COVID-19, Dr Michael Greger reveals not only what we can do to protect ourselves and our loved ones during a pandemic, but also what human society must rectify to reduce the likelihood of even worse catastrophes in the future. From tuberculosis to bird flu and HIV to coronavirus, these infectious diseases share a common origin story: human interaction with animals. Otherwise known as zoonotic diseases for their passage from animals to humans, these pathogens - both pre-existing ones and those newly identified - emerge and re-emerge throughout history, sparking epidemics and pandemics that have resulted in millions of deaths around the world. How did these diseases come about? And what - if anything - can we do to stop them and their fatal march into our countries, our homes, and our bodies? In *How to Survive a Pandemic*, Dr Michael Greger, physician and internationally-recognized expert on public health issues, delves into the origins of some of the deadliest pathogens the

world has ever seen. Tracing their evolution from the past until today, Dr Greger spotlights emerging flu and coronaviruses as he examines where these pathogens originated, as well as the underlying conditions and significant human role that have exacerbated their lethal influence to large, and even global, levels. *How to Survive a Pandemic* Michael Greger, M.D., FACLM 2020-05-26 A vital, timely text on the viruses that cause pandemics and how to face them, by the New York Times bestselling author of *How Not to Die*.
