idea, and find out the best ways to create, assemble, and present projects--including special tips on how to display them. Try out some of Janice VanCleave's favorite experiments on topics from astronomy and biology to chemistry, math, and engineering. As you have fun completing these experiments, you'll be learning the secrets of science fair success. Praise for Janice VanCleave's books "Stunningly clear, direct, and informative projects."--School Library Journal "[They] not only teach children the basics of science, but also entertain along the way . . . great for kids."--Parent Guide [Prize-Winning Science Fair Projects for Curious Kids](#) Joe Rhatigan 2006 New in Paper It's coming sooner than you think--the time to prepare for the next science fair! For projects, for presentation, for blue-ribbon winning ideas, there's no better place to come than here. From thinking of a unique science fair experiment to putting fabulous finishing touches on the display, this

cool collection of smart and illustrated projects gives budding scientists everything they need to put together a winner--and have fun doing it, too. Kids have seen all the tricks, and they're tired of science fair books that show them (yawn) how to make the "been there, done that" volcano or another boring model of the solar system. Here are experiments they really want to do, on subjects such as slime, magic sand, video games, mummies, dog germs, horoscopes, bicycles, and more. The whole science fair experience is broken down into small, manageable steps, so youngsters won't feel overwhelmed. All safety precautions are taken, with notes on parental supervision, when necessary.

Creating Science Fair Projects with Cool New Digital Tools

Susan Henneberg 2013-12-15

A science fair project is an opportunity for teens to choose a subject of interest, investigate it using the scientific method, and share their findings. While the

scientific method never goes out of date, much about science fair research and presentation has changed with the advent of digital tools. Readers learn how they can use digital tools to brainstorm a question, research and take notes, collaborate with teammates, record and organize data, and create presentations using multimedia. As required by the Common Core, readers learn to use technology to produce and publish their work and to collaborate with others.
