Inside this book, you'll discover how to: Safely use Copilot without risking your privacy or personal data Write emails, letters, and documents in Word without starting from scratch Create Excel formulas, charts, and insights without knowing any math or code Build PowerPoint presentations from a single sentence or document Summarize long emails, meetings, and Teams chats in seconds Master the "Trust but Verify" rule so AI never replaces your judgment Fix mistakes, refine results, and guide Copilot like a helpful intern—not a boss Every chapter is organized for real-world use, not theory. You'll find practical examples, troubleshooting help, and an essential prompt library you can reuse again and again. The tone is calm, reassuring, and empowering—perfect for readers who want clarity without jargon and progress without pressure. This is not a book about the future of AI.
