A Concise History of the Middle East Ibrahim Al-Marashi 2024-10-07 A Concise History of the Middle East provides a comprehensive introduction to the history of this region. Spanning from the pre-Islamic era to the present, it explores the evolution of Middle Eastern institutions and culture, the influence of European colonialism and Western imperialism, regional modernization efforts, the struggle of various peoples for political independence, the Arab-Israeli conflict, the reassertion of Islamist values and power, the issues surrounding the Palestinian Question, and the Middle East following 9/11, the 2011 Arab uprisings, and the regional crisis that erupted after 7 October 2023. The thirteenth edition has been fully revised to reflect the most recent events in, and concerns of, the region, including its future in the face of climate change and challenges in Iraq, and developments in the Israeli-Palestinian conflict. In addition, the important role of Middle Eastern women in the history of the region is woven into the narrative. New parts and part timelines will help students grasp and contextualize the long and complicated history of the region. With updated biographical sketches and a new concluding chapter, this book remains the quintessential text for students of Middle East history.

Uncertain Destinies and Destinations Natalie Fritz 2022-05-01 Media-produced images of people on the move and religion influence our conceptions of migration. These images have varied content and intent. Some provide awareness of the frequently disturbing situation of people who have lost everything, who have had to leave their homes and families and are desperately searching for new possibilities. Others exploit the traumatic topic and the fate of its subjects to entertain their audience with sensational news, which may include images of vast streams of people making their way to a safe haven in new countries. The mediatization of the phenomenon of flight introduces new pictures and perceptions into current debates about migration. It also requires that we interrogate how we view and engage such images and audiovisual documents. Ethical debates about responsibilities combine with questions about the role of religion and its functions. The present volume approaches the subject of migration and religion from an interdisciplinary perspective with a focus on audiovisual representation. The contributions consider feature films, documentaries, television reports, short films, and press photos.

The Blue Commons Guy Standing 2022-07-07 A FINANCIAL TIMES

BEST ECONOMICS BOOK OF 2022 'A landmark book... The Blue Commons is at once a brilliant synthesis, a searing analysis, and an inspiring call to action.' - David Bollier 'With remarkable erudition, passion and lyricism, Guy Standing commands the reader to wake up to the threat posed by rentier capitalism's violent policies for extraction, exploitation and depletion of that which is both common to us all, but also vital to our survival: the sea and all within it.' - Ann Pettifor 'Shines a bright light on the economy of the oceans, directing us brilliantly towards where a sustainable future lies.' - Danny Dorling 'This is a powerful, visionary book - essential reading for all who yearn for a better world.' - Jason Hickel The sea provides more than half the oxygen we breathe, food for billions of people and livelihoods for hundreds of millions. But giant corporations are plundering the world's oceans, aided by global finance and complicit states, following the neoliberal maxim of Blue Growth. The situation is dire: rampant exploitation and corruption now drive all aspects of the ocean economy, destroying communities, intensifying inequalities, and driving fish populations and other ocean life towards extinction. The Blue Commons is an urgent call for change, from a campaigning economist responsible for some of the most innovative solutions to inequality of recent times. From large nations bullying smaller nations into giving up eco-friendly fishing policies to the profiteering by the Crown Estate in commandeering much of the British seabed, the scale of the global problem is synthesised here for the first time, as well as a toolkit for all of us to rise up and tackle it. The oceans have been left out of calls for a Green New Deal but must be at the centre of the fight against climate change. How do we do it? By building a Blue Commons alternative: a transformative worldview and new set of proposals that prioritise the historic rights of local communities, the wellbeing of all people and, with it, the health of our oceans.
