Writing for College: the Eight Step Program to Writing Academic Argument Papers Using the Template Method Rebecca Smith

2012-04-13 *Writing for College: the Eight Step Program to Writing Academic Argument Papers Using the Template Method* is designed to help students who have been needlessly struggling with writing for their college classes because they fail to understand how college writing differs from other types of writings. This book has two goals. One, to provide you, the student, with a template to follow in composing your own standard academic essay and two, to explain how and why you should follow the process of producing original researched academic essays when trying to prove competency in English writing in colleges and universities. You know how to write; what you need are the rhetorical skills to help you write better. This book can help.

Understanding and Evaluating Research Sue L. T. McGregor 2017-10-25 *Understanding and Evaluating Research: A Critical Guide* shows students how to be critical consumers of research and to appreciate the power of methodology as it shapes the research question, the use of theory in the study, the methods used, and how the outcomes are reported. The book starts with what it means to be a critical and uncritical reader of research, followed by a detailed chapter on methodology, and then proceeds to a discussion of each component of a research article as it is informed by the methodology. The book encourages readers to select an article from their discipline, learning along the way how to assess each component of the article and come to a judgment of its rigor or quality as a scholarly report.

Logical Argument in the Research Paper Russ Ward 1997 *Logical Argument in the Research Paper* operate son the premise that collegiate-level writing, when cast in its most significant and sophisticated form, is argumentative. Students are shown how writers examine a potential topic, establish a stance upon that topic, defend the stance, avoid reasoning and ethical rrors, and in general say something meaningful about the topic. It also includes instruction about finding sources, gathering information from them, and correctly

documenting them. However, the emphasis remains on how effective writers evaluate sources, think about the information they discover, prepare a fair and informed argument, rethink and revise the argument, and finally present an argument in its completed form. *Logical Argument in the Research Paper* will help students learn some of the reasoning processes that all writers use when composing the academic argument.

The Curious Researcher Bruce P. Ballenger

2001 *The Curious Researcher 3/e* offers a fresh approach to research by reminding readers that curiosity is still the best reason for uncovering information and ideas. This author provides ample proof that the research process, like the writing process, can be full of rewarding discoveries. Using a variety of examples from both professional writers and students, this book shows that good research and lively writing do not have to be mutually exclusive. Readers are encouraged to not only develop sound research and analytical skills, but to examine ways to bring their writing to life, even though they're writing with "facts." Though *The Curious Researcher* stands apart from similar texts because of its motivational qualities, it also features full explanations of the technical aspects of the research paper. MLA citation conventions are given extensive treatment, and APA standards are also explained in the Appendix. For writers of research papers.

Writing Argumentative Essays Nancy V. Wood 1998 This argumentative rhetoric covers the many forms of argument, includes illustrations, and concludes with coverage of the research process, it does not include the reader/casebook from its parent text, *Perspectives on Argument, 2/e*.

Perspectives on Argument with APA Guidelines Nancy V. Wood 2002-06 For freshman/sophomore-level writing courses that teach argumentation. This combination rhetoric/reader helps students develop strategies for critical reading, critical thinking, research, and writing that will help them argue clearly and convincingly. It teaches them to identify and develop arguments, to read and form reactions and opinions of their own, to analyze an audience, to seek common ground, and to use a wide, realistic range of techniques to write argument papers that express their individual views and original perspectives on modern issues. The Rhetoric portion includes clear explanations and examples of argument theory and reading and writing processes, research and documentation skills, and offers engaging, class-tested writing assignments and activities. The Reader portion includes 75 reading selections covering seven broad issue areas and 18 more focused areas, all of contemporary concern. Unique chapters discuss

student argument styles, Rogerian argument, and argument and literature.
