Boiler Operator's Guide

Anthony L. Kohan 1997-10-22
If you're a boiler professional, the Fourth Edition of this classic guide offers you the latest guidelines for installing, operating, and maintaining boilers in all types of facilities. The book now covers federal and state jurisdictional requirements...changes to the ASME Boiler Code, such as the new confined space entry requirements... the liberalization of the overseas requirement to obtain U.S. National Board

Certification...and the use of new materials in boiler construction. It also contains questions & answers that help you review for oral and written license tests.

Nondestructive Testing and

Evaluation of Fiber-Reinforced

Composite Structures

Shuncong Zhong 2022-04-01

This book presents a detailed description of the most common nondestructive testing (NDT) techniques used for the testing and evaluation of fiber-reinforced composite structures, during manufacturing and/or in service stages. In order to facilitate the understanding and the utility of the different NDT techniques presented, the book first provides some information regarding the defects and material degradation mechanisms observed in fiber-reinforced composite structures as well as their general description and most probable causes. It is written based on the extensive scientific research and engineering backgrounds of the authors in the NDT and structural health monitoring (SHM) of structural systems from various areas including electrical, mechanical, materials, civil and biomedical engineering. Pursuing a rigorous approach, the book establishes a fundamental

framework for the NDT of fiber-reinforced composite structures, while emphasizing on the importance of the technique's spatial resolution, integrated systems analysis and the significance of the influence stemming from the applicability of the NDT and the physical parameters of the test structures in the selection and utilization of adequate NDT techniques. The book is intended for students who are interested in the NDT of fiber-reinforced composite structures, researchers investigating the applicability of different NDT techniques to the inspections of structural systems, and NDT researchers and engineers working on the optimization of NDT systems for specific applications involving the use of fiber-reinforced composite structures.
