2018-07-25 Since their introduction in 1964, American muscle cars have been closely associated with masculinity. In the 21st century, women have been a growing presence in the muscle car world, exhibiting classic cars at automotive events and rumbling to work in modern Mustangs, Camaros and Challengers. Informed by the experiences of 88 female auto enthusiasts, this book highlights women's admiration and passion for American muscle, and reveals how restoring, showing and driving classic and modern cars provides a means to challenge longstanding perceptions of women drivers and advance ideas of identity and gender

equality.

### Teaching Life Skills in the School Library

Blanche Woolls 2019-03-08 Drawing on stories from successful programs and research, this book shows librarians how to provide students with the practical information they need for a bright future. Chapters cover career readiness, financial literacy, and civic responsibility at each grade level. From preschool through high school, students are preparing for their future. As they move through grade levels, they choose courses, research potential careers, learn about managing money, and recognize the responsibilities of being active citizens. At each step of the way, librarians can collaborate with teachers to help students to learn how to live in a world they can only imagine. School librarians

are positioned to make a positive impact on students' lives when it matters most. Focusing on preparation for life after high school, this book cites research and provides anecdotes of successful programs as examples of how school librarians, in collaboration with counselors, community members, public libraries, and teachers, can develop collections and offer programming to show students the importance of finishing high school. Chapters also explain how to help students to find the college or university that fits with their educational interests and won't cause them to incur enormous debt. Included in every chapter are activities, resources, and lesson plans around topics at each grade level for librarians to co-teach with teachers, counselors, and other school staff.

Training in the Motor Vehicle Repair and Sales Sector in the Netherlands European Centre for the Development of Vocational Training 1994 Training in the motor vehicle repair and sales sector in the Netherlands was examined in a study that included the following approaches:

review of the sector's structure/characteristics, institutional and social context, employment practices, changing conditions, and available education and training; in-depth case studies of four auto repair shops and dealerships (two small, one medium-sized, and one large firm); and identification of economic, employment, and training trends. It was discovered that, in response to stagnation of the Dutch motor vehicle sales and repair industry in the 1990s, both the Dutch government and the industry have increased their commitment to vocational training and inservice courses and have created a training infrastructure that compares favorably with those of other sectors in the Dutch economy. All four businesses studied in depth were managed by individuals who were very involved in training, had access to good facilities and opportunities for on-the-job teaching/training, and could avail themselves of good external provisions for inservice training. Quality of service was an important element of
