Performance Tasks and Rubrics for Early

Elementary Mathematics Charlotte Danielson 2016-02-26 Performance tasks are highly effective tools to assist you in implementing rigorous standards. But how do you create, evaluate, and use such tools? In this bestselling book, educational experts Charlotte Danielson and Pia Hansen explain how to construct and apply performance tasks to gauge students' deeper understanding of mathematical concepts at the early elementary level. You'll learn how to: Evaluate the quality of performance tasks, whether you've written them yourself or found them online; Use performance tasks for instructional decision-making and to prepare students for summative assessments; Create your own performance tasks, or adapt pre-made tasks to best suit students' needs; Design and use scoring rubrics to evaluate complex performance tasks; Use your students' results to communicate more effectively with parents. This must-have second edition is fully aligned to the Common Core State Standards and assessments

and includes a variety of new performance tasks and rubrics, along with samples of student work. Additionally, downloadable student handout versions of all the performance tasks are available as free eResources from our website (www.routledge.com/97811389069891), so you can easily distribute them to your class.

A Sampler of Mathematics Assessment Tej Pandey 1991 The California Assessment Program (CAP) administers tests to all public school students at certain grade levels, compiles the results, and provides information that allows educators to judge the effectiveness of their programs and make improvements. This sampler describes the types of assessment that CAP

proposes to respond to the needed changes that reflect the recent curricular reforms in schools throughout California. The four types of assessment planned for CAP are: (1) open-ended problems; (2) enhanced multiple-choice questions; (3) investigations; and (4) portfolios. These modes of assessment are recommended for adaption for teachers of all grade levels and teachers are encouraged to use the examples in the booklet to enhance classroom instruction and to develop tasks for student assessment. After chapter 1 that describes the changes in assessment, the sampler is divided into six major parts: chapter 2, "Assessment of Mathematical Power"; chapter 3, "Types of Assessment"; chapter 4, "Performance Standards and Judging a Student's Work", chapter 5, "Implementation of Authentic Assessment in Your School," chapter 6, "Sample Problems." A "Participation and Feedback" page is given to ask participants' comments and suggestions about the sampler. (11 selected references) (MDH)

Improving Schools from the Bottom Up

Patrick M. Shields 1995 This document presents findings of a national study of effective schools programs and other school-based reforms conducted during school year 1991-92. The reforms were broadly defined to encompass school-site improvement efforts designed to develop schoolwide capacity for problem solving, to improve teaching, and to increase student learning. Data were obtained from a survey of a nationally representative sample of local school districts (n=1,555), surveys of administrators in all state education agencies, and intensive case studies of 5 states, 16 districts, and 32 schools. Data from the district survey show that school-based reform was relatively widespread, occurring at all school levels. The case-study data suggest that change efforts varied widely across districts and schools. The study examined

the degree to which the reform effort involved meaningful collaboration among school staff, staff ownership of the change process, a focus on teaching and curriculum, building professional capacity among staff, and a focus on student outcomes and equity. The case-study data suggest that the more promising examples of school-based reform often shared a set of characteristics--a clear focus on creating more challenging learning experiences for all students, a school culture in which teachers worked collaboratively and had a voice in decision making, and opportunities for faculty development. The following recommendations are made for supporting promising reform efforts: (1) find a balance between top-down and bottom-up structures; (2) adapt leadership and vision at every level of the system; (3) build local capacity-building systems; (4) devolve some authority to school staff; and (5) clearly tie government mandates and requirements to learning goals. A total of 32 tables and 1 figure

are included. Appendices contain notes on methodology and copies of the survey instruments. (LMI)

Math, Grade 4 2015-01-05 Applying the Standards: Math for grade 4 offers 64 pages of targeted math practice. It is aligned with the Common Core State Standards and includes a problem-solving rubric, a standards alignment chart, and standard-specific pages of math problems and performance tasks. Fourth graders will be able to prove deep understanding of topics ranging from factors and multiples, multiplication and division, addition and subtraction of fractions, and converting measurements, to line and angle geometry. The Applying the Standards: Math series emphasizes higher-level thinking by requiring students to complete performance tasks to prove understanding of each standard. This is a series of six 64-page books for students in kindergarten to grade 5. All grade-level math skills are covered, and a culminating reflection question
