

Digraphs And Blends Fluency

Effective School Consultation George M. Sugai
1993 This practical text provides special educators with strategies they can actually use in collaborating with other professionals and parents. The authors cover such topics as when to ask for help and when to refer and offer readers a compilation of the best practices to follow for effective consultation and collaboration. Designed primarily for special educators who work with other educators in planning, implementing, and evaluating education programs for students with learning and/or behavior difficulties, this text provides a systematic approach to the skills of consultation. The authors approach, prescriptive case consultation, emphasizes modifying teacher behavior and classroom environments, using

social learning principles to assist consultees, and applying a direct approach to intervention selection and decision-making. Unlike other texts that focus more on the process of consultation, this text focuses on practical skills, including: * How to choose an appropriate intervention * How to use change in client behaviors as a measure of consultation and intervention success. * How to collect useful assessment data, including published assessment instruments, functional analyses, curriculum-based measurement, and ecological assessment. * How to identify and analyze problems * How to implement and monitor basic building, classroom, and individual behavior management strategies * How to manage meetings, communicate with others, prepare written communications, and work on specific

problem situations

Instructional Assessment of English Language Learners in the K-8 Classroom Diane K. Brantley 2007 This classroom-ready resource provides teachers in grades K-8 with specific assessments that can be administered to English language learners within the regular classroom. Long

overdue and with a focus on the needs of English language learners (ELLs) within the classroom, *Instructional Assessment of English Language Learners* is a unique book designed to teach readers the basic concepts of assessing English. Today's education courses place an increasing emphasis on the regular classroom teacher to instruct and assess English language learners. Yet, classroom teachers have few resources available to them in regard to assessing ELLs within their classrooms. This book helps readers master the assessments to be administered to English learners and cover a range of literacy skills deemed necessary for English language acquisition and reproduction, while also assessing the student's literacy skills in their primary language. The overarching goal of this book is to enable teachers to acquire a deep understanding of the value of instructional assessment for ELLs and the importance of evaluating the results to provide the students with immediate, appropriate and meaningful

instruction. The book addresses the specific areas of language arts related to the development, acquisition, and reproduction of the English language: oral language development and vocabulary; concepts of print and the alphabetic strategies; word recognition and word identification strategies; reading fluency; reading comprehension; written language development and spelling; content area literacy; procedural knowledge; and problem-solving strategies. The strategies presented in this text are research-based and are known to increase reading comprehension for ELLs.

Making the Most of Small Groups: Differentiation for All grapples with difficult questions regarding small-group instruction in elementary classrooms such as: How do I find the time? How can I be more organized? How do I form groups? How can I differentiate to meet the needs of all of my students? Structured around the five essential reading elements - comprehension, fluency, phonemic awareness, phonics, and vocabulary - the book provides practical tips, sample lessons, lesson plans and templates, suggestions for related literacy work stations, and connections to whole-group instruction.
