Driving from Japan Wanda James 2015-08-13 This study chronicles the success of the Japanese car in America. Starting with Japan's first gasoline-powered car, the Takuri, it examines early Japanese inventors and automotive conditions in Japan; the arrival of Japanese cars in California in the late 1950s; consumer and media reactions to Japanese manufacturers; what obstacles they faced; initial sales; and how the cars gained popularity through shrewd marketing. Toyota, Honda, Datsun (Nissan), Mazda, Subaru, Isuzu, and Mitsubishi are profiled individually from their origins through the present. An examination follows of the forced cooperation between American and Japanese manufacturers, the present state of the industry in America, and the possible future of this union, most importantly in the race for a more environmentally-sound vehicle.

Surfing the Global Tide Michael S. Wynn-Williams 2009-04-22 "This book is a highly interesting historical, economic, and conceptual analysis of the automobile industry from a 'paradigmatic' perspective. It explains in great detail how scale and structure of car companies worldwide are determined by economies of scale and a certain extent of vertical integration. It also shows the limits of the present 'Budd' paradigm and provides an outlook to alternatives. This book is highly recommended for those interested in cars (nearly all of us), especially in this time of economic crisis that has great impact on the car industry as we know it." -Philip J. Vergragt Ph. D, Professor Emeritus of Technology Assessment, Senior Associate, Tellus Institute 'Surfing the Global Tide' is an important book at an important time. With automakers worldwide being battered by the global financial crisis, speculation abounds about consolidation, realignment and bankruptcy. Wynn-Williams' ambitious work applies to any company on the edge. In pinpointing the minimum size a carmaker must be to survive on its own, his research draws richly from both the theories of economics and the realities of the factory floor. His answer is that successful automakers can churn out a surprisingly low number of vehicles per year. The implications are broad reaching for a range of manufacturers, from Japan's Mazda Motor Corp. and Germany's Daimler AG to the nascent Chinese brands. 'Surfing' is a fascinating read for anyone interested in the future path of the globalized auto industry.' - Hans Greimel, Asia Editor, Automotive News.
