Raymond; Or, Life and Death, with Examples of the Evidence for Survival of Memory and Affection After Death Sir Oliver Lodge 1916
Below Stairs Mrs. Alfred Sidgwick 1913 Priscilla Day is 12 at the beginning of the novel and living with her parents. Mr Day has lost his job and they are poor. At 14 Priscilla starts as a skivvy in the village, then a maid in the household of Mr and Mrs Masters. Mrs Masters is a friend of her mother's but more prosperous and has a son, Harry, to whom Priscilla is attracted. Harry begins to court a local girl and Priscilla decides to move away and gets a job in London. The rest of the novel shows Priscilla's development. She has various jobs in service and becomes a well-trained parlourmaid. She returns to the village, taking a job in a house near her parents. She meets Harry again and starts walking out with him. She is not happy in her job; the mistress of the house constantly finds fault with the servants. She is also trying to bully a young heiress who lives with her into marrying her wastrel of a son. Priscilla helps the young woman and the expected happy endings materialise.

Hayes' Principles and Methods of Toxicology, Sixth Edition A. Wallace Hayes 2014-10-10 Hayes' Principles and Methods of Toxicology has long been established as a reliable reference to the concepts, methodologies, and assessments integral to toxicology. The new sixth edition has been revised and updated while maintaining the same high standards that have made this volume a benchmark resource in the field. With new authors and new chapters that address the advances and developments since the fifth edition, the book presents everything toxicologists and students need to know to understand hazards and mechanisms of toxicity, enabling them to better assess risk. The book begins with the four basic principles of toxicology—dose matters, people differ, everything transforms, and timing is crucial. The contributors discuss various agents of toxicity, including foodborne, solvents, crop protection chemicals, radiation, and plant and animal toxins. They examine various methods for defining and measuring toxicity in a host of areas, including genetics, carcinogenicity, toxicity in major body systems, and the environment. This new edition contains an expanded glossary reflecting significant changes in the field. New topics in this edition include: The importance of dose-response Systems toxicology Food safety The humane use and care of animals Neurotoxicology The comprehensive coverage and clear writing style make this volume an invaluable text for students and a one-stop reference for professionals.
