teaches accounting from both the preparer and user perspective. To lead students to a full understanding of the impact of financial statements on business decision-making, the authors use the financial statements from Winnebago Industries throughout the chapter and end of chapter material. Porter/Norton is unique in that it also uses a competing company to Winnebago, Monaco Coach, to do comparative financial analysis; this is reflected throughout the text and in end of chapter problems.

Solving Principles of Accounting Problems Using Excel for Windows 2005 This text helps students hit the road with a practical set of tools, and the confidence they need to use those tools effectively in making business decisions. The goal is to introduce a new Principles of Accounting text that better reflects a more conceptual and decision-making approach to the material. The authors have taken a new "macro- to micro-" approach to the Principles of

Accounting course by starting with a discussion of real financial statements first, rather than starting with the Accounting Cycle (although the Accounting Cycle is thoroughly covered in Chapters 3 and 4). The objective is to establish how a financial statement communicates the financing, investing, and operating activities of a business to users of accounting information. They motivate students by grounding the discussion in the real world, showing them the relevance of the topics covered to their future career.

**Intermediate Accounting, Analyzing and Solving Intermediate Accounting Problems Using Excel** Donald E. Kieso 2000-09-22 Over thirty years and ten best-selling editions, Kieso and Weygandt have built a reputation for accuracy and comprehensiveness.
