The Intentional Teacher Ann S. Epstein 2007 Here finally is a book that recognizes there is a middle ground where children and adults share responsibility for learning and that the most effective teachers make thoughtful, intentional use of both child-guided and adult-guided experience.

Early Childhood Experiences in Language Arts Jeanne M. Machado 2007 "Early Childhood Experiences in the Language Arts: Early Literacy," 8e is a tried and true reference with a goal to produce teachers who matter, teachers who are prepared, and teachers who are knowledgeable companions, exploring and sharing literature and language experiences with young children. In order to achieve this, the book encourages reflective thinking, allows practice of skills, and inspires the collection of ideas for future use. Now in its eighth edition, there are many new features and benefits that will arm the reader with valuable information they can take directly into practice. The book includes the most current national legislative efforts, as well as addressing public concern and interest in young children's language and foundational literacy skills. It also thoroughly addresses the interrelation of listening, speaking, reading, writing, and viewing language art's areas. While taking a high level view that paints a comprehensive picture of the most important aspects of teaching early

literacy, the book also takes a practical approach. The reader will learn very specific activities that include stories, poems, finger plays, and puppetry that they can utilize in a classroom setting. They will also learn curriculum for infants, toddlers, and preschoolers, with the theory followed up by deliberate "how-to" suggestions. Rounding out this comprehensive book, cultural diversity is addressed, as well as program planning ideas for English language learners and special needs children.

Developmentally Appropriate Curriculum

Marjorie J. Kostelnik 2007 This best-selling text has been thoroughly updated to include standards coverage and address all aspects of classroom life, including the roles of children and adults, the physical and social environments, and teaching and learning within multiple domains for children age three to eight. It provides a comprehensive, cohesive approach to curriculum development which results in greater continuity for children and practitioners in such formal group settings as childcare, pre-school, and the early elementary grades. Concentrating as much on the "how" of curriculum development as on the "what and why," the authors present numerous examples and practical, research-based guidelines-organized by developmental domain-for translating theory into best practice that accommodates age-appropriateness, individual differences, and social and cultural diversity. Readers learn how to conceptualize, plan, implement, and evaluate curriculum through detailed application opportunities in each chapter. For childcare, pre-school, and early elementary grades instructors.

A Creative Guide for Preschool Teachers Joanne Wylie 1972

Building the Reading Brain, PreK-3 Pat Wolfe 2004-04-19 The brain is hard wired for spoken language but not for reading. Yet reading skills serve as the primary foundation of all school-based learning, and research indicates that a student's future academic success can be predicted by his or her reading level at the end of third grade. With this latest resource, authors Patricia Wolfe and Pamela Nevills provide insight and assistance for preschool teachers, parents and care providers, and nursery and

primary teachers by explaining the development of the young brain, the acquisition of language as preparation for reading, and the nurturing and instruction process from birth to age eight. This unique guide demonstrates how the brain of a child masters the reading process of decoding print and reading with fluency and comprehension and addresses related literacy skills of writing and spelling. Brain-friendly strategies that lay the groundwork for reading success include: } activities to support phonemic awareness, phonics, vocabulary, comprehension, and fluency } applications of games, music, play, and instruction } intervention suggestions for children who are challenged or discouraged early readers.

Early Childhood Language Education and Literacy Practices in Ethiopia Kassahun Weldemariam 2023-10-30 This edited volume explores how indigenous knowledges and practices can be instrumental in improving literacy outcomes and teacher development practices in Ethiopia, aiding children's long-term

reading, and learning outcomes. The chapters present research from a collaborative project between Ethiopia and Norway and demonstrate how students can be supported to think pragmatically, learn critically and be in possession of the citizenship skills necessary to thrive in a multilingual world. The authors celebrate multilingualism and bring indigenous traditions such as oracy, storytelling, folktales to the fore revealing their positive impact on educational attainment. Addressing issues of language diversity and systematic ignorance of indigenous literacy practices, the book plays a necessary role in introducing Ethiopia's cultural heritage to the West and, hence, bridges the cultural gaps between the global north and global south. Arguably contributing one of the first publications on early literacy in Ethiopian languages, this book will appeal to scholars, researchers and postgraduate students studying the fields of early years literacy and language, indigenous knowledge and applied linguistics more broadly. Communication Disorders has grown exponentially in the last two decades and has come to encompass much more than audiology, speech impediments and early language impairment. The realization that most developmental and learning disorders are language-based or language-related has brought insights from theoretical and empirical linguistics and its clinical applications to the forefront of Communication Disorders science. The current handbook takes an integrated psycholinguistic, neurolinguistic, and sociolinguistic perspective on Communication Disorders by targeting the interface between language and cognition as the context for understanding disrupted abilities and behaviors and providing solutions for treatment and therapy. Researchers and practitioners will be able to find in this handbook state-of-the-art information on typical and atypical development of language and communication (dis)abilities across the human lifespan from infancy to the aging brain, covering all major clinical disorders and conditions in various social and communicative contexts, such as spoken and written language and discourse, literacy issues, bilingualism, and socio-economic status.
