*Rhyme and Rhyming in Verbal Art, Language, and Song* Venla Sykäri

2022-12-05 This collection of thirteen chapters answers new questions about rhyme, with views from folklore, ethnopoetics, the history of literature, literary criticism and music criticism, psychology and linguistics. The book examines rhyme as practiced or as understood in English, Old English and Old Norse, German, Swedish, Norwegian, Finnish and Karelian, Estonian, Medieval Latin, Arabic, and the Central Australian language Kaytetye. Some authors examine written poetry, including modernist poetry, and others focus on various kinds of sung poetry, including rap, which now has a pioneering role in taking rhyme into new traditions. Some authors consider the relation of rhyme to other types of form, notably alliteration. An introductory chapter discusses approaches to rhyme, and ends with a list of languages whose literatures or song traditions are known to have rhyme.

A New Theory of Old English Meter David L. Hoover 1985 A New Theory of Old English Meter sets out a simple new theory of Old English meter that is based on a bare minimum of initial assumptions and metrical principles, and supported by rigorous arguments and by evidence from a computer-assisted analysis of Beowulf and The Battle of Maldon. The new theory is revolutionary in concluding that alliteration rather than stress is the most important feature of the meter, and in rejecting the traditional assumptions of two lifts and four metrical positions per verse. It provides improved solutions for many of the perennial problems of Old

English meter, makes possible an elegant logical explanation for the kinds of verses that occur and those which do not occur, and prepares the way for the most radical conclusion of the book: that Old English meter is not based on rhythm.

Building a Writing Community Marcia Sheehan Freeman 1995 Explains how to create the philosophical and physical environment needed to develop successful writing communities in which students learn, practice, and apply writing-craft skills.

**Evaluating Second Language Vocabulary and Grammar**

**Instruction** Frank Boers 2021-03-14 Providing a much-needed critical synthesis of research on teaching vocabulary and grammar to students of a second or foreign language, this book puts the research into perspective in order to distil recommendations for language teaching. Boers evaluates a comprehensive range of both well-established and lesser-known research strands and classroom practices to draw out the most effective instructional approaches to teaching words, multiword expressions and grammar patterns. Chapters discuss learning as a by-product of communicative activities, language-focused instruction, diverse types of exercises, mnemonic techniques and more, with a view to building bridges between the available research on such instructional approaches and how they are commonly implemented in actual language courses and textbooks. This book helps teachers make research-informed decisions regarding their instructional approaches to words, phrases and patterns, and direct researchers to specific areas in need of further inquiry. Boers not only demonstrates how research findings can inform

effective teaching, but also calls for a deeper appreciation on the part of researchers of the realities of the teaching profession, making this a worthwhile text for preservice teachers, teacher educators, graduate students and scholars.

*Spelling Skills, Grades 7 - 8* Smith 2008-09-03 Support students' spelling, phonics, and writing skills with *Spelling Skills* for grades 7 and up. This 128-page book teaches spelling skills through whole-group and individual instruction and includes enrichment activities, a glossary, a list of children's literature, student spelling inventory, reproducibles, and an answer key. Students grasp a well-rounded understanding of spelling skills, practice the skills with exercises, and apply those skills through writing assignments.
