Metaphysics, Sophistry, and Illusion Mark Balaguer 2021 Metaphysics, Sophistry, and Illusion introduces a novel kind of non-factualist view, and argues that we should endorse views of this kind in connection with a wide class of metaphysical questions. It also explains how these non-factualist views fit into a general anti-metaphysical view called neo-positivism.

The Expanded Social Scientist's Bestiary Denis Charles Phillips 2000 The (Expanded) Social Scientist's Bestiary addresses a number of important theoretical and philosophical issues in the social sciences from the perspective of contemporary philosophy of science. This expanded and revised edition contains four new chapters tackling such contemporary beasts as Popperian rules, narrative research, and various forms of constructivism. The chapters presented in this volume are, as far as possible, self-contained so that each chapter can be consulted without the necessity of having read the others, thus making this volume an invaluable guide for faculty members and graduate students in the whole of the social sciences and related applied fields.
