Rethinking Hospitality and Tourism

Education Marcela Fang 2025-03-11 This book offers empirical research, case studies and examples of best practice that address cutting-edge and contemporary higher education issues. It aims to inspire hospitality and tourism educators and scholars to embrace transformative learning approaches that promote student-centred learning in times of rapid change. The chapters explore transformative learning practices in hospitality and tourism education while disclosing innovative and transformative approaches to teaching and learning that respond to the changing needs and demands of both students and industry. The book advances the ongoing discussions and innovations in hospitality and tourism education and informs current and future research and practice. Its focus on digital technology and a range of innovative pedagogy for teaching and learning methods provides a practical, engaging and essential toolkit for teachers and learners. Chapter 16 is free to download as an open access publication under a CC BY licence. You can download it here: <https://zenodo.org/records/14604731>.

Digital Identities in Tension

Armen Khatchaturov 2019-06-18 Digital Identities in Tension deals with the ambivalence of universal digitalization. While this transformation opens up new possibilities, it also redistributes the interplay of constraints and incentives, and tends insidiously to create a greater malleability of individuals. Today, companies and states are increasingly engaged in the surveillance and management of our digital identities. In response, we must study the effects that the new industrial, economic and political logics have on ethical issues and our ability to act. This book examines the effects of digitalization on new modes of existence and subjectivation in many spheres: digital identity management systems,

Big Data and machine learning, the Internet of Things, smart cities, etc. The study of these transformations is one of the major conditions for more responsible modes of data governance to emerge.

Building the Future of Education Together: Innovation, Complexity, Sustainability, Interdisciplinary Research and Open Science

Maria-Soledad Ramirez-Montoya 2025-10-21 In the future education horizon, complexity and sustainable development represent major challenges for society in search of new solutions, to face critical problems from higher education and lifelong learning. Today, more than ever, it is essential to enhance research processes, promote innovation and educational strategies for the development of entrepreneurial skills, based on critical, scientific, and systemic thinking. The challenge will be to form citizens with critical, scientific, systemic, entrepreneurial thinking and committed to sustainable development (United Nations, 2015), but that also are emotionally intelligent, empathic, and cooperative. Complex thinking is a meta-competence with a high potential to contribute to future education where students involve critical, creative processes or divergent reasoning, with scientific, systemic, creative, and critical thinking subcompetencies (Ramírez-Montoya et al., 2022a; 2022b). This Research Topic aims to invite the sharing to expand knowledge and practices in the framework of the future of education, with original research articles and review articles, theoretical cases, methodological and applied works on digital education, lifelong learning, neuroeducation, open education, open innovation, open science, complexity, sustainability, interdisciplinarity, social impact, among others. Topics of interest include, but are not limited to, the following: □ Innovations and

best practices in training and research with social impact: cocreation, inclusive education, knowledge-based challenges, lifelong learning, digital education, educational technology, educational entrepreneurship models and educational innovation in higher education. □ Complexity and new knowledge based on interdisciplinary research studies: complex thinking, interdisciplinary scenarios, instruments for complexity, and intersectoral research (government, business, academia, society), as developmental drivers for reasoning competencies for complexity □ New avenues for open education in the framework of sustainability: open resources, open practices and open innovation in support of sustainable development goals. □ Interdisciplinary research for the future of education: network building, trends in higher education, internationalization and cultural aspects of online learning □ Open Science and non-traditional methodologies, technologies and facilities: artificial intelligence, open systems, simulation, robotic, network analysis, decision-making laboratories, open innovation labs, virtual labs, cyber-physicals labs, remote labs, computer-supported collaborative learning, intelligent tutoring, mentoring systems, learning analytics and educational data mining.

New Approaches to Local Climate Change Risk Analysis Åsa Gerger Swartling 2023-12-12
The JPI Climate - AXIS project "Unpacking climate impact CHAINs. A new generation of action - and user-oriented climate change risk assessments" (UNCHAIN) is approaching its end date (31.12.2022), and the project is looking for an opportunity to collect its remaining scientific publications into a Research Topic. The overall objective of UNCHAIN is to improve climate change risk assessment frameworks aimed at informed decision-making and climate change adaptation action through six methodological innovations: • To also cover the possible need for long-term and large-scale efforts of societal transformation; • To refine a structured method of co-production of knowledge and integrate this into impact modelling; • To develop and test an applicable framework for analyzing how societal change can affect local climate change vulnerabilities; • To develop and test a standardized analytical framework for

addressing uncertainties involved in local decision-making on climate change adaptation; • To integrate the trans-national impacts of climate change; and, • To link mitigation and adaptation in climate risk and vulnerability assessments.
