How Science Engages with Ethics and Why It Should Kristen Renwick Monroe 2024-04-22 We live in an era of extreme claims versus weak consensus on issues critical to the public. Is climate change a hoax, or is it destroying our planet? Were the vaccines and social distancing measures of COVID-19 designed to protect us, or were they an invasion of our liberty? How do we determine the validity of these claims and others like them? Can we find a reliable middle ground leading to policies that help everyone? How Science Engages with Ethics and Why It Should makes an impassioned plea for a scientific analysis of ethics, discussing what such a method is, why we need it, and what it can offer that other methods cannot. With contributions from leading thinkers across a range of disciplines, Part 1 explores the challenges facing scientists and how to establish ground rules that will both protect human subjects and guide researchers in the future. Part 2 explores the importance of evidence-based science for topics such as climate change, social care, political polarization and rational decision-making, showing how even good science can go wrong, at times contributing to disastrous effects. At the cutting edge of its discipline, How Science Engages with Ethics and Why It Should provides a compelling case for demanding evidence-based analysis to form the foundation of the discussions and policies that affect our very lives. With contributions by: Jeffrey Barratt, Peter Ditto, Jessica Maria Gonzalez, James W. Hicks, Mahtab Jafari, Rose McDermott, B.W. Sarnecka, Roxane Cohen Silver, Brian Skyrms, Teresa Sabol Spezio, Lawrence Sporty, Kyle Stanford, Ashley J. Drug and Substance Abuse Among Older Adults Louis A. Pagliaro 2022-03-07 Drug and Substance Abuse Among Older Adults provides a timely, comprehensive overview and analysis of the silent epidemic of drug and substance abuse involving elderly Americans. Combining the authors' individual 50-plus years of formal academic and clinical experience, the book presents a critical reflective analysis and synthesis of the published research associated with older adult psychotropic drug use and abuse in the United States. Chapters delineate related causes and consequences and provide the reader with guidance on how to minimize and effectively deal with this significant and growing problem. Related professional reminders throughout each chapter emphasize and remind readers of important basic content and principles, while common misbeliefs regarding specific abusable psychotropics and their use by older adults are debunked and corrected. Also included are carefully developed figures and tables to supplement chapter content along with explicit guides and tools to facilitate the assessment and diagnosis of abusable psychotropic dependence or use disorder. Health and social care professionals in the U.S. will learn to assess and diagnose abusable psychotropic dependence or use disorders among older adults and to provide clients quickly and accurately with appropriate, efficacious, and empirically validated treatment.

Making School Reform Happen Pamela Bullard 1993 Here at last is a book with a vision - not of what's wrong in American schools or what should be done to improve them - but about what is actually being accomplished right now in schools across the country that are committed

to teaching all children. This is a book about what works... and about the positive changes that take place when everyone involved in children's education joins ranks to create schools committed to teaching so that children learn. It is an important book - providing both a roadmap and a source of inspiration for parents, teachers, school administrators, Boards of Education, and those who care about children and their education. The success stories recounted here are amazing - test scores that catapult the performance of a school district from the bottom of the barrel to well above average performance in just a few years... schools once plagued by vandalism and disorderly students now beehives of educational activity and enthusiasm... parents who have become involved because they appreciate the welcoming atmosphere of their children's school. The Effective School movement began with an article published by Ron Edmonds in 1979 and has spread to dozens of motivated school systems throughout the U.S. The core of the program is seven "correlates" - guiding principles that underlie the Effective Schools improvement process. At the heart of this philosophy is the conviction that all children, regardless of race, socioeconomic status, or gender, can learn... and the commitment to creating schools that challenge and nurture and get results. What kind of community can create this kind of school? Any community that has the will to make the necessary changes, say educators who have succeeded. Although the changes aren't always easy, the results are undeniable. There are shining examples of effective schools across the country, from the Spanish Harlem area of New York City... to the schools of Junction City, Kansas, with its many mobile children of the military... the suburban schools of Frederick County Maryland... and the once-neglected Hollibrook Elementary School in Spring Branch, Texas. The stories of schools and school systems that have implemented an Effective Schools program are told here in the participant's own words. To this account, the authors interviewed over 450 people - teachers, parents, administrators, psychologists, government officials, and scores of others - and visited dozens of schools across the country - urban, suburban, and rural. The result is a book that shows exactly what's involved in initiating, implementing, and making

educational reform work.

Unraveling the Associations Between Diet and Mental Health

Bruno Bizzozero-Peroni 2026-04-17 Mental disorders represent one of the ten leading causes of disease burden worldwide, with a striking increase in prevalence observed between 1990 and 2021. In 2021, more than one billion individuals were affected by mental disorders, with depressive and anxiety disorders representing the most prevalent conditions, according to estimates from the University of Washington's Institute for Health Metrics and Evaluation. Despite the availability of effective prevention and treatment strategies, mental disorders continue to represent a significant burden of disability across the lifespan. Notwithstanding the fact that mental disorders can be prevented and treated by modifying risk factors and by advances in therapy, they continue to represent a significant burden of disability across the lifespan. It is therefore incumbent upon scientists to generate more high-quality evidence to enable health systems and governments to implement effective preventive and therapeutic programs to address this global health problem. The objective of this Research Topic is to provide scientific evidence on the associations/effects between dietary patterns or nutritional strategies and mental health outcomes throughout the life cycle. This endeavor falls within the domain of nutritional epidemiology. To achieve this objective, studies employing a variety of research designs, including experimental (pre-post, quasi-experimental, RCT), observational (cross-sectional, prospective/retrospective, case-control), and synthesis of available evidence (mini-reviews, narrative reviews, umbrella reviews, systematic reviews) are welcomed. These studies must analyze the role of dietary patterns on a range of mental health outcomes, including, but not limited to, self-concept, self-perception, positive affect, life satisfaction, cognitive function, well-being, negative affect, anxiety symptoms, depressive symptoms, disordered eating, psychological distress, sleep disorders, neurocognitive disorders, stressor-related disorders, and eating disorders. The editors of this

Research Topic welcome the submission of experimental articles, reviews, and observational studies that contribute to the scientific understanding of the relationship between dietary patterns and mental health outcomes. In particular, the editors encourage submissions that focus on, but are not limited to, the following research areas:

- Associations between dietary patterns (e.g., Atlantic, Plant-Based, Mediterranean, Planetary Health) or consumption of specific foods (e.g., fruits, nuts, whole grains, sugar-sweetened) and mental health outcomes.
- Relationships between eating habits (e.g., family meals, frequency of breakfast consumption, meal duration) and mental health outcomes.
- Impact of diet interventions on mental health outcomes.
- Clinical nutrition exploring the role of gut microbiome, inflammatory biomarkers, and other potential mediators on mental health. In addition, studies examining diet in conjunction with other lifestyle-related behaviors, including physical activity, sedentary behaviors, social network use, and sleep, and their impact on mental health outcomes, will be considered for review.

Teaching Language and Literacy James F. Christie 2003 The unique focus of this text integrates constructivist learning, diversity, and instruction-based assessment, and helps translate principles into practice. The central, underlying thesis of *Teaching Language and Literacy* is that children are at the center of all good language and literacy teaching. The text, with broad coverage of preschool through the elementary grades, advocates an appreciation of student diversity and an implementation of assessment strategies relating to specific learning/teaching events. The text describes how children construct their own knowledge about oral and written language by engaging in integrated, meaningful, and functional activities with other people in a variety of contexts. It then goes one step further, describing how teachers can design authentic classroom reasons for using oral and written language. In keeping with the text's theme, illustrations of how teachers can work effectively with diverse learners appear throughout the text. In addition, instructionally-linked assessment is another important topic central to the text.
