**Education in Africa** A. Babs Fafunwa 2022-09-01 First

published in 1982, *Education in Africa* offers a comprehensive treatment of the development of education in Africa. Until now only scattered documents on educational growth in individual countries have been available; works devoted to Africa as a whole have tended towards the general and have, by and large, been written by outside observers. This book is a collection of illuminating syntheses of major trends in educational development in Africa, by renowned African educationists, and is the first attempt to supply the need for a comprehensive book on African education written from an African viewpoint. All but one of the chapters were written specially for the book by leading African educators each of whom has had a distinguished career and wide experience in education in his or her own country; they represent eleven nations in all.

The volume is designed for African students, teachers and administrators and will also be welcomed by educational planners and by scholars working in the fields of comparative education and the history of education. It will be of special interest to departments, institutions and faculties of education in all the universities and colleges of education in Africa, and to educators and students worldwide who are concerned with comparative African education.

Reshaping Food Systems to improve Nutrition and Health in the Eastern Mediterranean Region Ayoub Al-Jawaldeh  
2023-01-09 This detailed and comprehensive study examines nutrition and health in the World Health Organization (WHO) Eastern Mediterranean Region, presenting the six game-changing food systems actions proposed by the WHO and the progress of their implementation in the region. The WHO Eastern Mediterranean Region is a particularly complex place to

study: an area of economic contrasts with changing dietary patterns and stark differences between high levels of malnutrition and a prevalence of overweight and obesity. As a result, actions to improve the nutritional situation of the population are urgently sought. The strategies explored in this book offer a unique opportunity to change food systems all over the world, addressing aspects including sustainable food production, the impact of marketing and labelling on behaviour, and the effect of global events such as climate change, war and the COVID-19 pandemic. Reshaping Food Systems is an essential read at a time when malnutrition in all its forms, including undernourishment, micronutrient deficiencies and overweight and obesity, pose a serious threat to global health, and is of particular interest for policymakers working in nutrition and public health.

Identities in Contemporary

Africa: Gender, Religion, and

Ethno-cultural Identities

explores the changing

dynamics of identities in Africa,

with a focus on gender, ethno-

cultural, and religious identity.

Toyin Falola and Emmanuel M.

Mbah argue that because

identity defines who we are as

individuals or groups, studies

on African identities must focus

on understanding the changing

dynamics in the socio-economic

and political spheres in the

continent. These chapters

cover subjects such as

women's career identity,

gender roles and knowledge,

childlessness, ethnocentrism

and democracy, cultural

identity through theater, Black

identity in the diaspora, and

diasporic consciousness. Using

existing scholarship, the

chapters in this edited volume

challenge our understanding of

what identity entails and

provide new discussions on the

hitherto politicized

historiography of some

identities in Africa.
