Integration of Women in Basic Needs Activities and Cooperative Development in Nepal Neeru Shrestha 1985

Maternal and Child Health John Ehiri 2009-10-03 Our current era of globalization, war, and socioeconomic unrest has revealed public health as a worldwide concern and a major frontier for social justice with maternal and child health at its epicenter. Yet, there has been a relative scarcity of training resources specifically dedicated to this crucial area. "Maternal and Child Health: Global Challenges, Programs, and Policies" addresses this gap in current knowledge by analyzing the range of socioeconomic and environmental factors, health care disparities, politics, policies, and cultural practices that impact the health and safety of mothers, as well as the well-being and optimum development of their children. Individual sections focus on unequal distribution of the world's resources, politics and power, specific disease concerns, programs, policies and emerging concerns with a focus on what is currently being done, and what needs to be done to improve the health status of women, children, and adolescents. The book's contributors are some of the world's most respected experts, carefully selected to represent different global geographic regions and diverse professional disciplines related to maternal and child health from both academic and field practice perspectives. Among the topics in this authoritative volume: The impact of war, globalization, gender inequity, and harmful traditional practices (e.g., female genital mutilation). Specific health concerns, including tuberculosis, malaria, HIV, and malnutrition. Child and adolescent health issues, from abuse and neglect to children in difficult circumstances. Pregnancy-related issues: safety, abortion and post-abortion care, teen pregnancy, and more. Strategies for planning, developing, and maintaining maternal and child health systems in developing countries. The status of global initiatives, such as Integrated Management of Childhood Illnesses and the

Millennium Development Goals. The status of evidence-based maternal and child health in the developing world. With such a wealth of information on both practical and conceptual levels, "Maternal and Child Health: Global Challenges, Programs, and Policies" is as relevant to students and researchers in the field as it is to policy makers and those working for global health and development organizations. It also makes an excellent stand-alone text for courses in global health in general and global maternal and child health in particular.

Independent review of the Working for Health programme and its Multi-Partner Trust Fund

World Health Organization 2024-02-12 The Working for Health five-year action plan for health employment and inclusive economic growth (2017-2021) draws on the recommendations of the report of the United

Nations High-level Commission on Health Employment and Economic Growth. It is delivered principally through the joint intersectoral W4H programme and its Multi-Partner Trust Fund (MPTF) in partnership with WHO, ILO and OECD. A major part of its objectives is to stimulate workforce actions in alignment with national, regional and global strategies and plans. These actions are delivered at country and regional level through multisectoral Member State-led collaboration and catalytic technical and financial support. Other joint W4H work includes developing and adapting key global public goods, including an international platform for health worker mobility, an interagency data exchange platform, an ILO and OECD approach to anticipating the skills needs of health workers, and a methodology for measuring employment impact. This document presents the findings of an independent end-of-project review of the Working for Health five-year action plan for health employment and inclusive economic growth (2017–2021) Working for Health Multi-Partner Trust Fund over the first action plan period. This included direct support to 13 countries, two economic regions and three global projects. The review is based on the evaluation criteria of relevance, efficiency, effectiveness, impact and sustainability. The review also looks to the future of sustaining investment and support for implementation of subsequent projects under the new Working for Health 2022–2030 Action Plan and its MPTF, which was extended by Member States at the Seventy-fifth World Health Assembly in May 2022.
