The Arts as Meaning Makers

Claudia E. Cornett 1999 This comprehensive introductory book shows teachers how to meaningfully integrate literature, art, drama, dance, and music throughout curricular areas by providing a basic arts knowledge base. It summarizes the concepts and skills of five art forms and shows teachers how to plan and implement units and specific lessons which integrate at least one art form with a curricular area in each lesson.

Research-based Instructional Practices of Effective Principals

C. Steven Bingham 2018-06-19 This book addresses the gap in literature on evidence-based instructional strategies for school leaders. It offers research, examples, action plans, and frameworks for principals and educators. Useful for principal-

preparation programs, school district leaders, and educational associations.

School Reform in an Era of Standardization

Ian Hardy 2020-12-29 School Reform in an Era of Standardization explores how teachers and school-based administrators navigate the processes of accountability and standardization in schooling systems and settings. It provides clear insights into how the work and learning of teachers and students in schools have been dramatically reconstituted by increased pressures of external, political scrutiny and accountability. The book reveals in detail the nature and effects of standardization processes upon schools and schooling systems. Specifically, it shows how curriculum development, teaching and assessment practices have all been recalibrated under conditions

Best Practice Warmups For Explicit Teaching

of increased external scrutiny of teacher and student work and learning, and how such processes are manifest in curriculum dominated by attention to literacy and numeracy, more 'scripted' pedagogies and standardized testing. However, the research not only elaborates the detrimental effects of such processes, but also how those responsible for educating in schools - teachers, heads of curriculum, deputy-principals and principals - have responded proactively by interpreting, interrogating and challenging these conditions. In this way, it provides resources for hope - evidence of what are described as more 'authentic accountabilities' - and at the same time it provides a clear portrait of the difficulty of fostering substantive curriculum, teaching and assessment reform during an era of increasingly reductive accountability processes. It will be an invaluable resource for understanding and enhancing practices in schools and school

systems in the decades to come, and for giving hope to educators in the ongoing work of rebuilding trust in public education.

Inquiry and Invention in Physical Education Elizabeth Halsey 1964

Inclusive Education in Bilingual and Plurilingual Programs Mañoso-Pacheco, Lidia 2024-02-07 Implementing bilingual and plurilingual education programs has ushered in a transformative era for educators worldwide. These programs have redefined teaching practices and thrust diversity into the spotlight as a central concern. During this paradigm shift, the need to cater to diverse students has become paramount, particularly in monolingual European contexts where bilingual and plurilingual instruction is often perceived as a formidable challenge, especially for learners with special needs. *Inclusive Education in Bilingual and Plurilingual Programs* assembles a compendium of international theoretical and

practical contributions, shedding light on the intricate interplay between diversity and bilingual or plurilingual education. This book delves into the multifaceted realm of attention to diversity in education, where the focus is on tailoring teaching methods to the specific needs of students, encompassing differences in abilities, learning paces, and styles, which empowers students to acquire essential competencies and attain educational objectives at each stage of their academic journey. Secondly, it traverses the landscape of bilingual and plurilingual education, which has emerged in response to the societal, employment, and economic demands for language proficiency beyond one's mother tongue. This book is essential reading for many educational stakeholders engaged in bilingual or plurilingual education. Teachers at every educational level, along with teacher trainers at tertiary institutions, will find valuable insights for tailoring their pedagogical

approaches to the unique needs of their students.

Just-in-time Teaching Gregor M. Novak 1999 The authors explain how a group of higher education schools used just-in-time teaching (JiTT) methods to increase interactivity for the physics student. By enhancing courses with multimedia Web activities and electronic communications, the classroom environment allowed less dependence on lecture and more rapid responses to students' problems.

New Considerations and Best Practices for Training Special Education Teachers Bell,

Jeremy 2022-02-18 The topic of special education is rich in

knowledge and pedagogy that covers multiple disciplines within the school environment. Many special educators complete graduate degrees and explore a variety of topics within the special education context; however, there is a need for more resources that provide essential knowledge to special education professionals. *New Considerations and Best Practices for Training Special Education Teachers* discusses best practices and strategies special education professionals require to become more proficient in teaching students with exceptional needs and addresses the most important components of the special education teacher's job. Serving as a guide of what a special educator must know to be effective within the classroom and providing an overview of the most important components of the special education teacher's job, the needs of the special educator, along with new research in the field, this timely book covers a range of topics such as

assistive technologies and special education law. It is ideal for special education teachers, industry professionals, guidance counselors, academicians, professors, researchers, practitioners, and students. **Individual Sports for Men and Women** Rachael Dunaven Yocom 1947 **The Effective Teaching of Language Arts** Donna E. Norton 1993 Field-tested and backed by sound research, this popular methods book provides readers with a broad background in language arts, including assessment and instruction in the major areas of speaking, listening, writing, and reading. Thoroughly encompassing the 'back-to-basics' movement and the trend toward literature-based instruction, it offers clearly developed methodologies and lessons, and makes extensive use of children's actual language samples to illustrate ways literature can enhance the development of language arts skills. Written by an award-winning author, the

Best Practice Warmups For Explicit Teaching

book focuses on material that embraces the needs of all learners: linguistically-different children, multicultural children, and children with learning disabilities and handicaps. Emphasizing the importance of literature-based strategies and the identification of literature that can be applied to each of the language arts, it offers 'For Your Plan Book', a special section at the end of most chapters which provides concrete ideas, field-tested lessons and unit plans teachers can take right into their classroom. Literature chapters are now moved to the forefront of the book, enabling instructors to place a greater emphasis on literature-related language arts. Strong methodologies in the composition chapters now encompass the writing process, plus results of a five-year composition study of the relationships between writing and literature. Foundational Skills for Writing
Melanie Meehan 2026-01-29
Strengthen the foundational skills that set students up for writing success Writing is more than putting words down on paper—it's a tool for thinking and learning, a vehicle for expression and connection. Yet, writing instruction has often received less attention than reading, even though it's just as complex. In fact, writing is one of the most complex tasks the brain coordinates, drawing simultaneously on language skills, executive functions, and motor processes. Foundational Skills for Writing tackles that complexity by offering evidence-based methods, purposeful strategies, and playful approaches teachers can use to nurture essential writing skills. By supporting educators in developing the cognitive, motor, and language foundations of writing, this book helps students succeed academically, express themselves authentically, and connect meaningfully with the world. Drawing from brain-based research and the science

Best Practice Warmups For Explicit Teaching

of writing, this book provides: Clear explanations of each foundational writing skill, including executive functions, oral language, motor skills, handwriting, spelling, and sentence construction. Practical connections to neurological research on the writing brain and how writing skills develop. Strategies, lessons, and routines that strengthen writing foundations during busy school days. Instructional activities to introduce, reinforce, and review foundational writing skills across primary, elementary, and middle school classrooms— skills that support growth in every area of literacy. Vetted tools, authentic examples, and practical scaffolds—making it a read-today, teach-tomorrow resource for immediate classroom impact. Educators will gain the knowledge and tools to nurture young writers' growth, support them through challenges, and build their confidence and competence. *Creating Meaning Through Literature and the Arts* Claudia

E. Cornett 2007 This best-selling resource contains proven techniques for integrating literature, art, music, drama and dance into daily classroom instruction. Complete with research-based examples, authentic teacher stories, and strategies for integration, it addresses INTASC standards, assessment and differentiated instruction throughout. Discover ten ways to integrate the arts using the Arts Integration Blueprint presented in the book. Explore each art form and use the compendium of starter activities (presented in Seed chapters) to generate sound, creative ways to incorporate literature, art, music, drama and dance into K-8 classrooms. National Testing in Schools Bob Lingard 2015-11-06 Over the last two decades, large-scale national, or provincial, standardised testing has become prominent in the schools of many countries around the globe. *National Testing in Schools: An Australian Assessment* draws on research to consider the

Best Practice Warmups For Explicit Teaching

nature of national testing and its multiple effects, including: media responses and constructions such as league tables of performance pressures within school systems and on schools effects on the work and identities of principals and teachers and impacts on the experience of schooling for many young people, including those least advantaged. Using Australia as the case site for global concerns regarding national testing, this book will be an invaluable companion for education researchers, teacher educators, teacher education students and teachers globally. Comprehension First Claudia Cornett 2017-06-30 This book is about designing instruction that makes comprehension the priority in reading and in content area study. The comprehension model described responds to calls from literacy experts and professional organizations for inquiry-based instruction that prepares readers to be active meaning makers who are adept at both critical and creative

thinking. Comprehension First introduces a before, during, after Comprehension Problem Solving (CPS) process that helps readers ask key questions so they arrive at a substantial comprehension product-"big ideas" based on themes and conclusions drawn from literary works and expository texts. The book further describes how to orchestrate research-based best practices to build lessons and units around big ideas and important questions. In this age of multiple literacies, all of us must learn to be more nimble users of Literacy 2.0 communication tools.

Mastering problem solving is at the core of this challenge.

Comprehension First embraces this challenge by inviting present and future teachers to examine WHY and HOW these tools can be used more purposefully to achieve the pre-eminent literacy goal of deep comprehension.
