Against Race- and Class-Based Pedagogy in Early Childhood Education Stephanie C.

Smith 2016-04-29 This book examines differing classroom pedagogies in two early childhood programs serving vulnerable populations in Chicago, one program Reggio Emilia-inspired, while the other uses a more didactic pedagogy. The structure of classroom pedagogies is defined using Basil Bernstein's theories of visible and invisible pedagogy.

Opening the Common Core Carol Corbett Burris 2012-03-13 The CCSS open the door to success Do you wish you could leverage the Common Core State Standards (CCSS) to equip all students—not just high achievers—with the higher-level thinking skills they need? You can, and this book will show you how. The authors helped lead their district—Rockville Centre in Long Island, New York—in closing achievement gaps and increasing the number of students who completed four-year college programs. The results of their efforts show a remarkable increase in both excellence and equity in English language arts, math, and science. This book outlines the authors’ research-based ACES framework for instructional improvement to help achieve similar results: Acceleration rather than remediation Critical thinking Equity in education for all students Support Educators will find practical strategies that are applied and

developed in model lessons linked to the CCSS and KSUS (Knowledge and Skills for University Success) standards. Understanding why we need to prepare all children to be college and career ready is easy. Making it happen is not. Learn from those who have succeeded, and your students will reap the rewards.
