Handbook on ICT in Developing Countries Knud Erik Skouby

2022-09-01 Handbook on ICT in Developing Countries: Next Generation

ICT Technologies is the second volume of the Handbook of ICT in

Developing Countries. The first volume was on the potential

implementation and service delivery of the forth-coming 5G networks.

Here the focus is on the new technologies and services enabled by 5G

networks or broadband Internet networks including artificial Intelligence

(AI), machine learning, augmented reality, Internet of Things (IoT),

autonomous driving, blockchain solutions, cloud solutions etc. Some of

these are already globally experiencing growth in the existing networks

and all of them are expected to grow substantially in the future.

Examples: currently, 5% of global organizations have fully adopted AI,

but the penetration is expected to increase rapidly before 2025. IoT with

20.35 billion devices connected in 2017 is estimated to show 75.44

billion devices connected in 2025. The expected growth is based on

delivering of new value to businesses and citizens. It is, however, not

obvious that this growth will also occur in developing countries.

Currently, the digital divide between developing countries and developed

countries is widening. This is mostly due to the lack of infrastructure and

low level of awareness by the businesses and citizens of the value made

possible by the new technologies for developing countries. The book

discusses the potentials of the new technologies for developing countries

and the need for market interventions that will facilitate the demand and

supply side of the market. It is designed for a broad audience including practitioners, researchers, academics, policy makers and industry players and influencers. The language and approach to the handbook is a combination of the academic writing style and professional reviews.
