**Numerical Calculation of Lubrication** Ping Huang 2013-07-19 Focusing on basic lubrication problems this book offers specific engineering applications. The book introduces methods and programs for the most important lubrication problems and their solutions. It is divided into four parts. The first part is about the general solving methods of the Reynolds equation, including solutions of Reynolds equations with different conditions and their discrete forms, such as a steady-state incompressible slider, journal bearing, dynamic bearing, gas bearing and grease lubrication. The second part gives the 'energy equation solution'. The third part introduces methods and programs for elasto-hydrodynamic lubrication, which links the Reynolds equation with the elastic deformation equation. The final part presents application lubrication programs used in engineering. Provides numerical solution methodologies including appropriate software for the hydrodynamic and elasto-hydrodynamic lubrication of bearings Offers a clear introduction and orientation to all major engineering lubrication problems and their solutions Presents numerical programs for applications in engineering, with special topics including grease-lubricated bearings and gas bearings Equips those working in tribology and those new to the topic with the fundamental tools of calculation Downloadable programs are available at the companion website With an emphasis on clear explanations, the text offers a thorough understanding of the numerical calculation of lubrication for graduate students on tribology and engineering mechanics courses, with more detailed materials suitable for engineers. This is an accessible reference for senior undergraduate students of tribology and researchers in thin-film fluid mechanics.

Delphi Collected Works of Saint Jerome (Illustrated) Saint Jerome 2022-05-22 The most learned of the Latin Fathers, Saint Jerome had an eventful life, spending time as a hermit, becoming a priest, serving as secretary to Pope Damasus I and later establishing a monastery at Bethlehem. His most ambitious achievement was his Latin translation of the Bible, the Vulgate, based on a Hebrew version, rather than the Septuagint. He believed that mainstream Rabbinical Judaism had rejected the Septuagint as invalid scriptural texts, due to Hellenistic mistranslations. Jerome's numerous biblical, ascetical, monastic and theological works went on to have a profound influence in the early Middle Ages. Delphi's Ancient Classics series provides eReaders with the wisdom of the ancient world, with both English translations and the original Latin texts. This eBook presents Jerome's collected works, with illustrations, introductions and the usual Delphi bonus material. **Young's Literal Translation of the Bible** Young, Robert 2014-06-14 Young's Literal Translation of the Bible is, as the name implies, a strictly literal translation of the Hebrew and Greek texts (from the Textus Receptus and Majority Text). Compiled by Robert Young in 1862, he went on to produce a revised version in 1887 based on the Westcott-Hort text which had been completed in 1885. Young died on October 14, 1888, and the publisher released a New Revised Edition in 1898. Young used the present tense in many places where other translations used the past tense- particularly in narratives. The Preface to the Second Edition states: "If a translation gives a present tense when the original gives a past, or a past when it has a present; a perfect for a future, or a future for a perfect; an a for a the, or a the for an a; an imperative for a subjunctive, or a subjunctive for an imperative; a verb for a noun, or a noun for a verb, it is clear that verbal inspiration is as much overlooked as if it had no existence. THE WORD OF GOD IS MADE VOID BY THE TRADITIONS OF MEN. [Emphasis in original.]" For example, the YLT version of Genesis begins as follows: 1. In the beginning of God's preparing the heavens and the earth--- 2. The earth hath existed waste and void, and darkness on the face of the deep, and the Spirit of God fluttering on the face of the waters, 3. And God saith, 'Let light be;' and light is. 4. And God seeth the light that it is good, and God separateth between the light and the darkness, 5. And God alled to the light 'Day,' and to the darkness He hath called 'Night;' and there is an evening, and there is a morning---day one. Young's Literal Translation in the 1898 Edition also consistently renders the Hebrew Tetragrammaton (the four Hebrew letters usually transliterated YHWH or JHVH that form a biblical proper name of God) throughout the Old Covenant/Testament as

"Jehovah", instead of the traditional practice of "LORD" in small capitals, which was used in editions prior to 1898. Young's usage of English present tense rather than past tense has been supported by scholars ranging from the medieval Jewish rabbi Rashi (who advised, "If you are going to interpret [this passage] in its plain sense, interpret it thus: At the beginning of the creation of heaven and earth, when the earth was (or the earth being) unformed and void . . . God said, 'Let there be light.'") to Richard Elliott Friedman in his translation of the Five Books in "The Bible with Sources Revealed" (2002). There is a linked Table of Contents for each book and chapter.
