Ready to Lead? Robin Niblett 2009 This report by Director of Chatham House Dr Robin Niblett draws on Chatham House's international expertise and contacts to offer an in-depth analysis of President Obama administration's ambitions to renew US leadership in the world. The report explores how the Obama administration can promote US global leadership at a time when many of the pillars of its international role have been weakened. Looking at how the US will need to craft new ways of using its unique power and capacity to influence others, the report's key conclusions are as

follows: America needs to change how it uses its power by sharing leadership where partners have as much - or more - to offer. America needs to focus less on its 'opponents' and more on supporting its friends and allies in Europe, Latin America, the Middle East and Asia. America needs to place less emphasis on individual leaders and parties and more on governance and political processes.

Twilight War Mike Moore 2008-03-03

Considering the historical background of space militarization and providing an overview of the United States' efforts to militarily dominate space since the dawn of the space age, this book

argues that America must either ensure that space-related weapons are verifiably banned for all nations through an international treaty or definitively choose a policy of unilateral space dominance that may lead to an arms race in space and possibly to another cold war. The 1967 Outer Space Treaty designated space as the “province of all mankind.” It expressly prohibited nuclear and non-nuclear weapons of mass destruction in orbital space and exclusively limited the use of the Moon and other celestial bodies for “peaceful purposes.” But changes in the post-Cold War world, as well as unforeseeable advances in satellite and weapons technologies, have compelled every space-faring nation—save the U.S. and Israel—to go on record as favoring a new treaty for the Prevention of an Arms Race in Outer Space. In *Twilight War: The Folly of U.S. Space Dominance*, Mike Moore, former editor of *The Bulletin of the Atomic Scientists*, argues that the U.S. merely provokes conflict when it presumes

to be the exception to the rule. Rejecting treaty negotiations while further militarizing space renders America unable to lead by example. Moore concludes that instead of trying to stop an arms race in space by starting one, the U.S. must radically rethink its strategy.

Work, Family, and Workplace Flexibility

Kathleen Christensen 2011-10-10 This volume contains a collection of articles that examines workplace flexibility, work-family conflict, and workers' increasing lack of leisure time and how it pertains to long-term U.S. national stability. The contributors argue that current workplaces are not meeting the needs of today's workers, and the lack of workplace flexibility is having huge human capital costs that are affecting every sector of society. They explore how flexibility, despite having fixed costs, can be an effective tool for attracting and retaining employees and increasing productivity -- the key being to make the workplace flexible in ways

that are profitable for employers and also engage workers to feel more satisfied and committed to their jobs.

The Cold War - Part 2 Communists and capitalists united in World War II to defeat the Axis powers. But following victory in 1945 the allies became adversaries. The world's two great superpowers--the United States and Soviet Union--locked in a dramatic showdown over ideology, vision and freedom that would persist for five decades. Under the omnipresent threat of nuclear holocaust, the Cold War became the defining conflict of the twentieth century. The second of two parts, this documentary program chronicles the unrest within the Soviet bloc, the Cuban Missile Crisis, proxy-wars in Vietnam and elsewhere, Detente, the Reagan-Gorbechev era, and the collapse of the Soviet Union and liberation of its communist satellite states.

The Subjects and Subjectivities of

International Criminal Law Emily Haslam

2024-02-22 This book provides a critical introduction to the core elements of international criminal law. It does so by provoking thought on what international criminal law is, or could be, by contrasting the practice of widely recognised state-based actors and institutions such as the International Criminal Court with practices associated with non-state actors in particular citizens' tribunals. International criminal law is now established as an essential legal and institutional response to atrocity. However, it faces a series of political and practical challenges. It is vital to consider its limits and potential, as well as the ways and

extent to which those limitations might be addressed. Many actors with very different visions of its nature and parameters play a role in shaping the meaning of international criminal law whether that be in official or unofficial spaces. This book explores the principles and institutions of international criminal law alongside the alternative visions of it put forward by citizens' tribunals. In so doing it encourages reflection on that law's multiple meanings and usages in order to provoke consideration of what it means, and might mean, to deploy international criminal law today. *The New Cold War* Edward Lucas 2009-03-17 The first edition of *The New Cold War* was published to great critical acclaim and Edward Lucas has established himself as a top expert in the field, appearing on numerous programs, including Lou Dobbs, MSNBC, NBC Nightly News, CNN, and NPR. In this new revised and updated edition for 2009, Lucas reveals: -The truth about the corrupt elections that made

Dmitri Medvedev President of Russia -How, as prime minister, Vladimir Putin remains the de facto leader of Russia -The Kremlin's real goals in waging war in Georgia; -How the conflict might soon spill into other former Soviet republics. Hard-hitting and powerful, *The New Cold War* is a sobering look at Russia's current aggression and what it means for the world.
