Margaret Chase Smith Marlene B. Vallin 1998-06-10 The selected

speeches of Senator Margaret Chase Smith of Maine made throughout her 32 year career in the U.S. Congress are critically analyzed in this rhetorical study. The inquiry focuses on the factors of her political persona that garnered her the support of her constituents and the respect of her colleagues. The chapters are each titled with a segment of her political identity—an American, a Republican, and a women. Thus this work will be of interest to students and scholars of U.S. politics, communications, and women's studies. In addition, this popular political figure should be of interest to readers who want to learn more about the first female U.S. Senator.

DEFCON-2 Norman Polmar 2006-01-01 The closest we've ever come to the end of the world "DEFCON-2 is the best single volume on the Cuban Missile Crisis published and is an important contribution to the history of the Cold War. Beyond the military and political facts of the crisis, Polmar and Gresham sketch the personalities that created and coped with the crisis. They also show us how close we came to the edge without becoming sensationalistic."—Larry Bond, bestselling author of *Dangerous Ground* Spy-satellite and aerial-reconnaissance photos reveal that one of the United States's bitterest enemies may be acquiring weapons of mass destruction and the means to use them against the American homeland. Administration officials refuse to accept intelligence professionals' interpretation of these images and order an end to spy missions over the offending nation. More than a month later, after vicious infighting, the president orders the spy missions to resume. The new photos reveal an array of ballistic missiles, capable of carrying nuclear warheads and striking deep within U.S. territory. It appears that the missiles will be fully operational within one week. This is not a plot setup for a suspense novel; it is the true story of the most terrifying moment in the 45-year Cold War between the United States and the Soviet Union: the Cuban Missile Crisis. DEFCON-2 tells this tale as it has never been told before—from both sides, with the help of hundreds of recently declassified U.S. and Soviet documents, as well as interviews with numerous former spies, military figures, and government officials who speak out here for the first time.

John F. Kennedy's 1957 Algeria Speech Gregory D. Cleva 2022-03-02 John F. Kennedy remains a compelling figure almost sixty years after his tragic assassination. Kennedy's voice—with all of its characteristic eloquence—as well as the engaging complexity of the man himself, are brought to life in John F. Kennedy's 1957 Algeria Speech. This book deals

with one of Kennedy's most important as a U.S. Senator—but least recognized—foreign policy speeches calling for Algerian independence after more than a century of French colonial rule. The reader will experience the debate surrounding Kennedy's speech of July 2, 1957, particularly the resistance it encountered from the Eisenhower administration, French officials, and French citizens, senior members of America's foreign policy community such as Dean Acheson and Adlai Stevenson, and editorial criticism in some of the most distinguished journals in the United States and France. The author offers new insights into Kennedy's reasons for giving this speech, as well as his extensive preparation spanning fifteen months. Cleva uses in depth scholarship to analyze several years of classified U.S. Government documents dealing with the Algerian crisis in order to provide this comprehensive study of Kennedy's Senate speech, how it shaped Kennedy's own administration, as well its significance to American foreign policy.

Gender and the Race for Space Erinn McComb 2025-06-10 The American astronaut image was informed by early Cold War ideals of masculinity that helped mold a distinctly American (anti-communist) masculinity, which appeared—on the surface anyway—to resolve not only an American “crisis of masculinity” but helped win the Cold War on an ideological and popular level. This American image focused on strict gender binaries of man as the protector, controlling technology and containing communism, while woman was the passive actor with spaceflight technology—left behind in the home waiting for the return of the astronaut husband. Allowing women to fly into space would have represented a lack of individual control with spaceflight technology.

Essays on the Cold War Murray Wolfson 2016-07-27 This book is concerned with the ideological origins of the cold war and how it was fought by economic means. The book revolves around four major themes. Firstly, it is argued that the origin of the cold war is not to be found in rational, economic motivation, but in ideology through which both the East and West perceived 'reality'. Secondly, these ideological preconceptions generated complex feed-back processes of hostility that lasted forty years. Thirdly, although this hostility was expressed in political, ideological and military terms, the decisive battle was fought in economic terms as each nation devoted resources to unproductive military purposes. Finally, the end of the cold war came with the collapse of the dysfunctional Soviet economy. Although, the Soviets lost the cold war, in the light of the ascendancy of its competitors, the United States did not win it.
