Modern Studies in Property Law, Volume 10 Ben McFarlane 2019-05-30 This book contains a collection of papers presented at the Twelfth Biennial Modern Studies in Property Law Conference held at University College London in April 2018. The conference and its published proceedings are an established forum for property lawyers from around the world to showcase the latest research. This collection includes a keynote address by Dame Elizabeth Gloster, former Vice President of the Court of Appeal (Civil Division), on technology in property law. It also includes plenary addresses by Professor Henry Smith on the architecture of property law and the challenge of compiling the American Law Institute's Fourth Restatement of Property, and by Her Honour Judge Karen Walden-Smith on the role of the first instance judge in property cases. Sixteen further chapters address a wide range of issues, including the theory and taxonomy of land law, the re-evaluation of land obligations, the nature and operation of equitable property rights and shares, the role of property in commerce, comparative approaches to

leases and trusts, and contemporary issues in land registration.

Collectively, the chapters demonstrate the vibrancy, diversity and importance of property law and of current research in the subject.

Civilization II Strategies and Secrets Jason R. Rich 1996 Master the all-new strategies of Civilization II, a totally revamped version of the original game which includes vastly improved graphics and sound. The book also includes network play capabilities that allow up to seven players to participate simultaneously online or on a network.

Women in Classical Video Games Jane Draycott 2022-08-11 Despite the prevalence of video games set in or inspired by classical antiquity, the medium has to date remained markedly understudied in the disciplines of classics and ancient history, with the role of women in these video games especially neglected. *Women in Classical Video Games* seeks to address this imbalance as the first book-length work of scholarship to examine the depiction of women in video games set in classical antiquity. The volume surveys the history of women in these games and the range of figures presented from the 1980s to the present, alongside discussion of issues such as historical accuracy, authenticity, gender, sexuality, monstrosity, hegemony, race and ethnicity, and the use of tropes. A wide range of games of different types and modes are discussed, including platformers, strategy games, roguelikes, MOBA, action RPGs, and story-driven romance mobile games. The detailed case studies presented here form a compelling case for the indispensability of the medium to both reception studies and gender studies, and offer nuanced answers to such questions as how and why women are portrayed in the ways that they are.
