Cities in South Asia

Crispin Bates 2015-05-22 Globalisation has long historical roots in South Asia, but economic liberalisation has led to uniquely rapid urban growth in South Asia during the past decade. This book brings together a multidisciplinary collection of chapters on contemporary and historical themes explaining this recent explosive growth and transformations on-going in the cities of this region. The essays in this volume attempt to

shed light on the historical roots of these cities and the traditions that are increasingly placed under strain by modernity, as well as exploring the lived experience of a new generation of city dwellers and their indelible impact on those who live at the city's margins. The book discusses that previously, cities such as Mumbai grew by accumulating a vast hinterland of slum-dwellers who depressed wages and supplied cheap labour to the city's industrial economy. However, it goes on to show that the new growth of cities such as Bangalore, Hyderabad, and Madras in south India, or Delhi and Calcutta in the north of India, is more capital-intensive, export-driven, and oriented towards the information technology and service sectors. The book explains that these cities have attracted a new elite of young, educated workers, with money to spend and an outlook on life that is often a complex mix of modern ideas and conservative tradition. It goes on to cover topics such as the politics of town planning, consumer culture, and the struggles among multiple identities in the city. By tracing the genealogies of cities, it gives a useful insight into the historical conditioning that determines how cities negotiate new changes and influences. There will soon be more mega cities in South Asia than anywhere else in the world, and this book provides an in-depth analysis of this growth. It will be of interest to students and scholars of South Asian History, Politics and Anthropology, as well as those working in the fields of urbanisation and globalisation.

Accounting Education and Research to Promote

International Understanding Kyojiro Someya 1988-12-07 The Sixth International Conference on Accounting Education was held just prior to the Thirteenth World Congress of Accountants. Hosted by the Science Council of Japan, the Japan Accounting Association, and the Union of National Economics Associations in Japan, in cooperation with the International Association on Accounting Education and Research, the 1987 conference marked the 25th anniversary of the founding of such conferences. The main theme of this conference was Accounting Education and Research Toward the Promotion

of International Understanding of Economic Progress. The twentieth century has seen increasing interaction and growing interdependency between the various nations of the world, stressing the need for greater cooperation at the international level. At the same time, however, individual nations have their own particular sociocultural identities, making for differences that must not be overlooked. The purpose of the conference was to provide an opportunity for an exchange of ideas to serve as an impetus to a greater flow of information resulting in better understanding and increased respect on an international level.

Community Series In Mental-Health-Related Stigma and Discrimination: Prevention, Role, and Management Strategies, volume II Renato de Filippis 2024-03-06 This Research Topic is the second volume of the "Community Series In Mental-Health-Related Stigma and Discrimination: Prevention, Role, and Management Strategies". Please see the first volume here. Despite the tremendous progress and successes achieved in diagnostics, therapy, and rehabilitation in psychiatry over the past few decades, the stigma towards mental health patients, their relatives and caregivers, and healthcare professionals is still present. Social stigma, in particular, represents a major obstacle to maintaining adequate mental health care. This increases reluctance to seek help delays patients' diagnosis and limits their compliance and adherence to treatment. In the long term, this reduces psychiatric rehabilitation effectiveness and causes a burden to healthcare providers and society alike. The main goal of this Research Topic is to evaluate the impact and role of stigma, in all its forms, on individuals with psychiatric disorders, their caregivers, and mental health providers.

The Call of Nepal: My Life In the Himalayan Homeland of Britain's Gurkha Soldiers

Cross, J P 2009-09-30 From the foreword by Robert D. Kaplan: "No one is more qualified to talk about the history of Nepal than Colonel John Philip Cross.... In his book *The Call of Nepal* Cross portrays his profoundly personal journal as he terms it rooted not only in the physical - but deeply in the mental emotional and spiritual. During his lifetime Cross has long practiced

linguistic and cultural immersion in Nepal both personally and in the context of his time with the Gurkhas in what today's military analysts must clearly see as an integral component of military success. But with today's military pace the time to achieve the depth of Cross's insight is not always affordable. A pioneer in many respects Cross saw fluency and correct use of language not only as a tactical weapon but also as a vital literally element of command. It is this depth of knowledge which also comes from understanding living and being part of Nepalese history that makes him and his writing such an invaluable resource."
