Teaching Discipline-Specific Literacies in Grades 6-12 Vicky I. Zygouris-Coe 2014-10-30 Comprehensive, timely, and relevant, this text offers an approach to discipline-specific literacy instruction that is aligned with the Common Core State Standards and the needs of teachers, students, and secondary schools across the nation. Transform Your Math Class Using Asset-Based Teaching for Grades 6-12 Michael D. Steele 2024-07-19 Foster a love of mathematics by creating a more inclusive and empowering learning environment through asset-based teaching! An asset-based perspective on math education means starting with what students already know instead of focusing on what's missing. This approach elevates student thinking and reasoning skills. In this way, educators acknowledge that all students bring prior experiences, strengths, talents, and resources to the learning process and can contribute meaningfully in an authentic learning environment. Transform Your Math Class Using Asset-Based Teaching for Grades 6-12 provides insight into asset-based perspectives in mathematics education to create an environment where all students feel valued and capable of being doers of mathematics. In the book, Michael Steele and Joleigh Honey highlight the importance of using language, instructional routines, and systemic structure that positively impact student engagement, their math identity, and ultimately their outcomes. Providing a wealth of knowledge and practical strategies that can be used to transform math classrooms into inclusive, supportive, and empowering learning environments, this book: Introduces an asset-based perspective that focuses on students' strengths, assets, and potential to learn mathematics Includes a variety of frameworks and tools that teachers can use to build and grow their sense of asset-based perspectives Offers strategies for promoting a growth mindset in mathematics, encouraging productive struggle in math, and promoting equitable math instruction Supports teachers in reflecting on their decisions, self-awareness, and self-management Includes a companion online study guide to support

teachers individually or as part of a professional learning community. Adopting asset-based perspectives is about movement over time, not about flipping a switch. This book paves the path for an asset-based journey that ultimately helps to transform our math classrooms and advance all students' learning and development.

Learning They'll Love Elizabeth Agro Radday 2025-11-26 Bridge the gap between the classroom and life outside it ... and build students' sense of the purpose and possibility of learning. Education is at a crossroads. The rapid rise of artificial intelligence is changing the academic landscape, and many traditional assignments can now be completed by AI tools with minimal student effort. Teachers and parents fear that students aren't being taught critical thinking and aren't being asked to apply it in the classroom. Meanwhile, teachers' efforts to engage and motivate are leading to burnout, and too many students find themselves increasingly bored and apathetic. This is the perfect time for personal interest projects (PIPs). PIPs are a cousin of project-based learning, but there's a crucial difference: Students choose their topics themselves through a scaffolded process of exploration and reflection, and they pursue goals they set and care about. Given the freedom to learn, make, solve, or do something that truly excites them, their motivation is internal and unstoppable, their engagement is authentic, and their learning is real. In *Learning They'll Love*, PIP pioneer and award-winning educator Elizabeth Agro Radday explains the three structured phases of the PIP process—Design, Create, and Share—and provides comprehensive guidance and more than 30 practical, classroom-tested tools to support seamless implementation in grades 5–12, across the content areas, and with various school schedules. Ready to help your students master

content standards and build the problem-solving, time management, collaboration, and communication skills that will serve them in any future they choose? Ready to transform their school experience and help them fall in love with learning? PIPs are the answer, and this book is your guide.

Guides to Library Collection Development John Thomas Gillespie 1994-08-15 Intended to enhance collection development in school, public, and college libraries, this volume lists and annotates approximately 1,500 significant bibliographies published from 1985 through 1993, with some earlier but still useful publications. Annotations indicate scope of the work, size (often the number of entries), kinds of material included, purpose, arrangement, nature of entries, indexes, special features, and a recommendation. Author, title, and subject indexes provide easy access to the entries. With its deep and comprehensive coverage, this work will help not only in the process of selecting and acquiring materials for the library but also in the process of identification of items for reference, readers' advisory, interlibrary loan, and collection evaluation.

Teaching History and the Changing Nation State Robert Guyver 2016-02-11 Capitalizing on the current movement in history education to nurture a set of shared methodologies and perspectives, this text looks to break down some of the obstacles to transnational understanding in history, focusing on pedagogy to embed democratic principles of inclusion, inquiry, multiple interpretations and freedom of expression. Four themes which are influencing the broadening of history education to a globalized community of practice run throughout *Teaching History and the Changing Nation State*: · pedagogy, democracy and dialogue · the nation - politics and transnational dimensions · landmarks with questions · shared histories, shared commemorations and re-evaluating past denials The contributors use the same pedagogical language in a global debate about history teaching and learning to break down barriers to search for shared histories and mutual understanding. They explore contemporary topics, including The Gallipoli Campaign in World War I, transformative approaches to a school history curriculum and the nature of federation.
