Concept Modules with Note-Taking and Practice Exams

Dennis Coon 2008 The Concept Module was written by Claudia Cochran of El Paso Community College; the Practice Exams, by Shawn Talbot of Kellogg Community College. For each chapter, this book gives students each chapter's key concepts in a visual layout, a place to take notes, and a practice exam of 20 multiple-choice questions.

EdPsych Modules Cheryl Cisero Durwin 2020-01-07 EdPsych Modules uses an innovative modular approach and case studies based on real-life classroom situations to address the challenge of effectively connecting theory and research to practice. Succinct, stand-alone modules are organized into themed units and offer instructors the flexibility to tailor the book's contents to the needs of their

course. The units begin with a set of case studies written for early childhood, elementary, middle, and secondary classrooms, providing students with direct insight into the dynamics influencing the future students they plan to teach. All 25 modules highlight diversity, emphasizing how psychological factors adapt and change based on external influences such as sex, gender, race, language, disability status, and socioeconomic background. The Fourth Edition includes over three hundred new references across all 25 modules, and expanded coverage of diversity in new diversity-related research. This title is accompanied by a complete teaching and learning package.
