Cost Accounting American Bankers Association. Savings Bank Division 1930

The Price Waterhouse Guide to Activity-based Costing for Financial Institutions Julie Mabberley 1996 From banks to brokerage houses, profitability is the watchword for today's financial institutions. The search is unceasing for better ways to achieve it, maintain it, and defend it against competitive pressures. For some time, managers within financial institutions have been aware of a powerful new tool for cost analysis developed in the manufacturing sector: activity-based costing (ABC). A handful of financial services consultants around the world have been helping their financial services clients to migrate ABC from its birthplace in the manufacturing sector to the world of financial services, where it can be immensely effective as a basis for strategic decisions. It was time for a book that clarifies for general executives how ABC works and what contributions it can make to the formation of winning strategies. And it was time for a practical, comprehensive book that initiates management accountants in the financial services sector into this new approach to cost analysis. The Price Waterhouse Guide to Activity-Based Costing for Financial Institutions is that book. The ABC approach is particularly effective because financial services companies sell services as well as products. Profitability measurement cannot rely on older, more traditional methods of cost accounting, techniques that focus on the costs of raw materials and labor. The Price Waterhouse Guide to Activity-Based Costing for Financial Institutions shows how these firms can use the breakthrough concept of ABC in the same way that other companies manage all activities from the top down, more efficiently. This book explains the methods of this technique, with detailed guidelines that help firms plan for costs before they occur, rather than simply monitoring them.

Bank Cost Control Benjamin Young 2008-11 PREFACE. THE Author of this very practical treatise on Scotch Loch - Fishing desires clearly that it may be of use to all who had it. He does not pretend to have written anything new, but to have attempted to put what he has to say in as readable a form as possible. Everything in the way of the history and habits of fish has been studiously avoided, and technicalities have been used as sparingly as possible. The writing of this book has afforded him pleasure in his leisure moments, and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general. This section is interleaved with blank sheets for the readers notes. The Author need hardly say that any suggestions addressed to the case of the publishers, will meet with consideration in a future edition. We do not pretend to write or enlarge upon a new subject. Much has been said and written-and well said and written too on the art of fishing but loch-fishing has been rather looked upon as a second-rate performance, and to dispel this idea is one of the objects for which this present treatise has been written. Far be it from us to say anything against fishing, lawfully practised in any form but many pent up in our large towns will bear us out when we say that, on the whole, a days loch-fishing is the most convenient. One great matter is, that the loch-fisher is dependent on nothing but enough wind to curl the water, -and on a large loch it is very seldom that a dead calm prevails all day, -and can make his arrangements for a day, weeks beforehand whereas the stream-fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river, it is quite another matter to arrange for a days river-fishing, if one is looking forward to a holiday at a date some weeks ahead. Providence may favour the expectant angler with a good day, and

the water in order but experience has taught most of us that the good days are in the minority, and that, as is the case with our rapid running streams, -such as many of our northern streams are, -the water is either too large or too small, unless, as previously remarked, you live near at hand, and can catch it at its best. A common belief in regard to loch-fishing is, that the tyro and the experienced angler have nearly the same chance in fishing, -the one from the stern and the other from the bow of the same boat. Of all the absurd beliefs as to loch-fishing, this is one of the most absurd. Try it. Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy, or even a cast similar to those which a crack may be using and if he catches one for every three the other has, he may consider himself very lucky. Of course there are lochs where the fish are not abundant, and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught, and where each has a fair chance. Again, it is said that the boatman has as much to do with catching trout in a loch as the angler. Well, we don't deny that. In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream-fishing...
