Turning on Learning Carl A. Grant 2008-10-28 With a wealth of ready-to-use lesson plans for grade levels K-12 covering a variety of subject areas, "Turning on Learning, Fifth Edition" shows students how to apply the principles of multicultural education in the classroom. This practical, lesson-based companion to Sleeter and Grant's "Making Choices for Multicultural Education: Five Approaches to Race, Class and Gender" features additional lesson plans and new resource material, along with updates of existing lesson plans. *Antenna Designs Using High Frequency Structure Simulator (HFSS)* Shibani K. Koul 2026-05-03 This book introduces the design process using HFSS to realize practical antennas. An overview of the commercial software to solve antenna design problems is introduced. Choice of solver for the specific antenna type is also explored in this book. Insights about the applications of HFSS are also presented. Design flow with detailed reasoning for a generic antenna simulation is discussed, which gives a thorough understanding of the simulation settings. A simple antenna is investigated in detail to equip readers with the analytical skills required to solve challenging antenna problems. A software perspective of the antenna parameters and its practical significance is also elaborated in the book. A detailed presentation on transmission lines and its graphical analysis is included. Numerous variants of classic antennas are analyzed in-depth to solidify the reader's design skills in these approaches. An exclusive chapter on fabrication and measurements is included to correlate the simulation results with those of the corresponding experimental results. Tips and tricks to ace simulations in High Frequency Structure Simulator (HFSS) is presented toward the end of the book.

Ergonomics in the Automotive Design Process Vivek D. Bhise 2024-07-10 Automotive design continues to evolve at a rapid pace. As electric cars become ever more commonplace on the roads to the advent of the driverless vehicle, understanding the ergonomics behind automotive engineering becomes ever more paramount. Vehicle attributes must be considered early during the new vehicle development program by coordinated work of multi-disciplinary teams to begin creating vehicle specifications and development of vehicle attribute requirements. In *Ergonomics in the Automotive Design Process: Concepts, Issues and Methods*, Vivek D. Bhise covers the need-to-know fundamentals as to what makes an ergonomically sound vehicle. This book covers the entire range of ergonomics issues involved in designing a car or truck and offers evaluation techniques to avoid costly mistakes and assure high customer satisfaction. Across 13 chapters, vehicle design and the attributes of vehicle handling, appearance (interior and exterior styling), safety and security, infotainment, noise and vibrations, emissions, costs and process compatibility are considered in the context of ergonomics. New material to this edition includes coverage of ergonomics in the systems engineering process, decision-making and risks in automotive product programs and ergonomic considerations in electric vehicle development. This book will allow the reader to develop a more comprehensive knowledge of issues facing the developers of automotive products and delivers methods to manage communication, coordination and integration processes. It provides more tools in implementing systems engineering to minimize the risks of delays and cost overruns, and most importantly, creates the right product for its customers. The reader will develop a knowledge of future in-vehicle devices that are easy to program and use, safe, cheap to manufacture and assemble and are eco-friendly From an author with over forty years of experience in automotive design, this title is an ideal read for students and practitioners of ergonomics, human factors, automotive design, civil engineering, product design, work design and mechanical engineering. Vivek D. Bhise is currently a LEO Lecturer/ Visiting Professor and a Professor in post-retirement of Industrial and Manufacturing Systems Engineering at the University of Michigan-Dearborn. He received his B.Tech. in Mechanical Engineering (1965) from the Indian Institute of Technology, Bombay, India, M.S. in Industrial Engineering (1966) from the University of California, Berkeley, and PhD in Industrial and Systems Engineering (1971) from the Ohio State University, Columbus, Ohio. During 1973 to 2001, he held several management and research positions at the Ford Motor Company in Dearborn, Michigan.
