

Dacor Dive Computer Manual

Deep Diving Bret Gilliam 1995 This is the first book to span the depth between traditional sport diving editions and the complex medical/commercial texts. It provides a balanced view of the fascinations and hazards of deep diving through extensive factual development of its technical chapters.

In Depth 1994

The United States Lifesaving Association Manual of Open Water Lifesaving B. Chris Brewster 1995 The only comprehensive manual for the training and reference of lifeguards at both surf and inland beaches, this manual is designed to be used in basic training of open water (beach) lifeguards and in junior lifeguard programs. It is an essential reference for beach lifeguard supervisors and administrators. This text is consistent with the requirements of the USLA Lifeguard Agency Certification Program. Over 300 pages in length, the manual contains over 100 photographs and 25 technical drawings.

Understanding Modern Dive Computers and Operation B. R. Wienke 2018-09-28 This brief provides a complete yet concise description of modern dive computers and their operations to date in one source with coupled applications for added understanding. Basic diving principles are detailed with practical computer implementations. Interrelated topics to diving protocols and operational procedures are included. Tests, statistics and correlations of computer models with data are underscored. The exposition also links phase mechanics to dissolved gases in modern decompression theory with mathematical relationships and equations used in dive computer synthesis. Applications focus upon and mimic dive computer operations within model implementations for added understanding. This comprehensive resource includes a complete list of dive computers that are marketed and their staging models, as well as a complete list of diveware marketed and their staging algorithms, linkage of pertinent wet and dry tests to modern computer algorithms, a description of two basic computer models with all constants and parameters, mathematical ansatz of on-the-fly risk for surfacing at any dive depth, detailing of statistical techniques used to validate dive computers from data, and a description of profile Data Banks for computer dive model correlations. The book will find an audience amongst computer scientists, doctors, underwater researchers, engineers, physical and biosciences diving professionals, explorers, chamber technicians, physiologists and technical and recreational divers.
