Handbook of Labor Economics Orley Ashenfelter 1986 Examines labour supply and demand and their impact on the wage structure. Explains the sources of income inequality, and the disincentive effects of attempts to produce a more equal distribution. Labour supply is considered in relation to the incentives which individuals have to provide labour services. Observes that heterogeneity in worker skills and employer demands often tempers the outcomes that would be expected in frictionless labour markets.

Valuing Wildlife Resources In Alaska George Peterson 2019-07-23 This book is a collection of papers written for a workshop on the economic value of Alaskan wildlife resources held at Denali National Park in September 1989. It provides resource managers and policy makers with enough background to address their own needs for economic information and analysis.

The Journal of Economic Perspectives 2006 This journal attempts to fill a gap between the general-interest press and other academic economics journals. Its articles relate to active lines of economics research, economic analysis of public policy issues, state-of-the-art economic thinking, and directions for future research. It also aims to provide material for classroom use, and to address issues relating to the economics profession.

Rural Investment Climate in Indonesia Neil McCulloch 2009 This book provides a comprehensive analysis of the constraints facing the development of rural non-farm enterprises in Indonesia. Recent years have seen a substantial effort by the Indonesian government to improve the investment climate. To date, much of this effort has focused on the constraints faced by businesses at the national level. However, if Indonesia is to be successful in creating jobs and reducing poverty across the archipelago, this will require improving the investment climate for the 15.7 million micro and small enterprises that employ more than half of all the non-farm workers in the country. This book brings together leading Indonesian and international academics to consider seven key constraints that RNFES face: labour regulations and practices; infrastructure; competition and marketing; knowledge transfer and technology; access to credit and financial services; local taxation and user charges; and insecurity. In each case the authors draw on the Indonesian Rural Investment Climate Survey, a unique dataset of more than 2,500 RNFES, to identify the size and nature of the constraints, the way in which they impact upon enterprise growth and the implications for policy. In addition, a key chapter estimates the strength of the linkage between agriculture and non-agricultural activities in rural areas, showing that agricultural revitalization is an essential complement to the development of the non-farm economy. "Understanding the rural investment climate in both slow- and fast-growing economies has taken on new urgency in the wake of the world food crisis. The rural non-farm economy often provides half or more of the income of farm families and is especially important for food-deficit rural households hard-hit by rising food prices. The Indonesian Rural Investment Climate Assessment is the "gold standard" for how to achieve this understanding. It is a delight to see it published and available to a wide audience." - C.
