The Complete Guide to Becoming an English Teacher Stephen Clarke 2004-03-22 `I could not help but admire the breadth and scope of this text. This is a book I would recommend to all, no matter what route they take to train as a teacher of English. It is aimed at secondary teachers but would be equally useful for those preparing to teach in further education. Not only does it provide concise and balanced accounts of key pedagogic issues, it also includes a range of interesting and engaging lesson suggestions. This book does cover a lot of ground with excellent chapters on planning, assessment, teaching reading and teaching poetry. This is a text that should accompany every student teacher of English and find its way on to the shelf of all practising teachers. This book excited me. It is written in a style that makes you want to try out activities and take up challenges. This book will encourage the student teacher to embrace the subject of English along with its associated values and debates' - ESCalate Read the full review as posted on the ESCalate website, the Education Subject Centre for the Higher Education Academy `If I was training to teach English today, this is the book I would want - an extraordinarily professional handbook of good practice. Compiled by a team of university lecturers, it admirably demonstrates the way theory and practice can combine to illuminate the carried demands of being an English Teacher today' -Geoff Barton, Times Educational Supplement, Teacher Magazine `I was most impressed.... Anyone following the modules as they are would learn a huge amount and benefit so much from them' - Donna Bryant, Deputy Head, Camborne School and Community College, Cornwall `The activities were both challenging and rewarding.... These would be useful and would promote self-reflection and the notions of personal progression and goal setting for the student' - Alan Jones Assistant Headteacher, Simon Langton Boys' School, Canterbury This is a complete guide to how to become a successful teacher of English in secondary school. The book enables readers to design a tailor-made programme to suit their individual needs as a student teacher. Either the learner or the tutor can select or combine units and activities, and there is no assumption of prior knowledge. This book is based on innovative teaching material developed by four institutions of higher education, which has been used to develop student teachers. Based on proven teaching success, and the authors' own experiences of teaching English in secondary schools, the book's key features include: - full coverage of the Revised Standards for Qualified Teacher Status, including creative approaches to delivering the framework for teaching English: years 7, 8 and 9. - the cultural, historical, social and political models which support the English teaching curriculum - English teaching for the development of an on-going working pedagogy, recognizing the need for dialogue and interaction with both theory and practice. - Inclusion, Equal Opportunities, Assessment and ICT included throughout with recognition of the importance of digital literacies. This is an essential book for English student teachers on flexible, graduate registered training schemes and traditional PGCE programmes. It is an essential resource guide for their tutors, for practising English teachers who want to update their skills, and for those doing Continuing Professional Development Diplomas, Masters Level work or PhDs.

Constructing History 11-19 Hilary Cooper 2009-07-09 This book describes and exemplifies strategies for teaching history across the 11-19 age range in rigorous and enjoyable ways. It illustrates active learning approaches embedded in pupil-led enquiries, through detailed case studies which involve students in planning and carrying out historical enquiries, creating accounts and presenting them to audiences, in ways that develop increasingly sophisticated historical thinking. The case studies took place in a number of different localities and show how practising teachers worked with pupils during each year from Y6/7 to Y 13 to initiate, plan and implement enquiries and to present their findings in a variety of ways. Each case study is a practical example which teachers can use as a model and modify for their own contexts, showing how independent learning linked to group collaboration and peer assessment can enhance learning. Social constructivist theories of learning applied to historical thinking underpin the book, with particular emphasis on links between personalised and collaborative learning and e-learning.
